NO. 1260. COMMERCIAL BUILDINGS— SELECTED CHARACTERISTICS, BY SQUARE FOOTAGE
FLOORSPACE: 1986

[Excludes buildings 1,000 square feet or smaller. Building type based on predominant activity in which the occupan engaged. Based on a sample survey of building representatives conducted between January and April 1986; therefore, sampling variability. For composition of regions, see fig. I, inside front cover]

CHARACTERISTIC	Number of buildings (1,000)	FLOORSPACE (mil. sq. ft.) Total	Within all buildings having square footage of— 5,000 or less	5,001 to 10,000	10,001 to 25,000	25,001 to 50,000	50,001 to 100,000	100,001 and over	Mean sq. ft. per building (1,000)

Section 27

Manufactures

This section presents summary data for manufacturing as a whole and more detailed information
r major industry groups and selected specific products. The types of measures shown at the dif-
rent levels include data for establishments; employment and wages; raw materials, fuels, and
ectricity consumed; plant and equipment expenditures; value and quantity of production and ship-
ents; value added by manufacture; inventories; and various indicators of financial status.

The principal sources of these data are Bureau of the Census reports of the censuses of manu-
ctures conducted every five years; the *Annual Survey of Manufactures;* and the *Current Industrial*
eports series, which presents monthly, quarterly, or annual data on production, shipments, and
ocks for particular commodities. Indexes of industrial production are presented monthly in the
deral Reserve Board's *Federal Reserve Bulletin.* Reports on current activities of industries, or
rrent movements of individual commodities, are compiled by such government agencies as the
reau of Labor Statistics; the Economic Research Service of the Department of Agriculture; the
ernational Trade Administration; and by private research or trade associations such as The Con-
ence Board, Inc., New York, and the American Iron and Steel Institute, Washington, DC.

Data on financial aspects of manufacturing industries are collected by the Bureau of Economic
alysis (BEA) and the Bureau of the Census. Industry aggregates in the form of balance sheets,
fit and loss statements, analyses of sales and expenses, lists of subsidiaries, and types and
ounts of security issues are published for leading manufacturing corporations registered with the
C. The BEA issues data on capital in manufacturing industries and capacity utilization rates in
nufacturing. See also section 17, Business Enterprise, in this edition.

ensuses and annual surveys.—The first census of manufactures covered the year 1809. Be-
en 1809 and 1963, a census was conducted at periodic intervals. Since 1967 it has been taken
ry 5 years (for years ending in "2" and "7"). Census data, either direct reports or estimates
n administrative records, are obtained for every manufacturing plant with one employee or more.

he Annual Survey of Manufactures, conducted for the first time in 1949, collects data for the
rs between censuses for the more general measures of manufacturing activity covered in detail
the censuses. The annual survey data are estimates derived from a scientifically selected
ple of establishments. The 1986 annual survey is based on a sample of about 56,000 establish-
ts of an approximate total of 350,000. It comprises all large plants, which account for approxi-
ely two-thirds of total U.S. manufacturing employment, and a representative selection of small
ts. Government-owned and -operated establishments are excluded.

he basic statistical measures of manufacturing activity, such as employment, payrolls, value
ed, etc., are defined in essentially the same way for both the annual surveys and the census of
ufactures. However, the bases for computing average employment vary for different years. For
nple, beginning with 1949, average employment was calculated from the figures reported for
pay periods ending nearest the 15th of March, May, August, and November, whereas for 1947
averages were based on 12 monthly employment figures. In 1967, the average employment
ulation was revised to the pay periods which include the 12th of March, May, August, and No-
ber to provide data more comparable with other statistical series.

tablishments and classification.—The censuses of manufactures for 1947 through 1982
r operating manufacturing establishments as defined in the *Standard Industrial Classification*
ual (SIC), issued by the U.S. Office of Management and Budget (see text, section 13). The
ual is also used for classifying establishments in the annual surveys. The comparability of man-
ures data over time is affected by changes in the official definitions of industries as presented
e *Manual.* It is important to note therefore, that the 1972 edition of the *Manual* was used for
972 census; and the 1972 edition of the *Manual* and the *1977 Supplement* was used for the
and 1982 censuses while the 1967 *Manual* was used for the 1967 census. For the censuses
1947 to 1963, reports were required from all establishments employing one or more persons
y time during the census year. Beginning with the 1967 census, an effort was made to relieve
ery small establishments from the necessity of filing a census report. Approximately 130,000
single-unit manufacturingfirms identified as having less than 20 employees (cutoff varied by
try) benefited from this procedure. Data for these single unit companies were estimated on the
of government administrative records and industry averages. Each of the establishments tab-
l was classified in one of the approximately 450 manufacturing industries as defined by the

SIC Manual in 1972, 1977, and 1982. The *Manual* defines an industry as a number of establishments producing a single product or a closely related group of products. In the main, an establishment is classified in a particular industry if its production of a product or product group exceeds in value added its production of any other product group. While some establishments produce only the products of the industry in which they are classified, few within an industry specialize to that extent. The statistics on employment, payrolls, value added, inventories, and expenditures, therefore, reflect both the primary and secondary activities of the establishments in that industry. For this reason care should be exercised in relating such statistics to the total shipments figures of products primary to the industry.

The censuses for 1947 through 1982 were conducted on an establishment basis. The term "establishment" signifies a single physical plant site or factory. It is not necessarily identical with the business unit or company, which may consist of one or more establishments. A company operating establishments at more than one location is required to submit a separate report for each location. An establishment engaged in distinctly different lines of activity and maintaining separate payrol and inventory records is also required to submit separate reports.

Statistical reliability.—For a discussion of statistical collection and estimation, sampling procedures and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970*. See Appendix IV.

NO. 1263. GROSS NATIONAL PRODUCT IN MANUFACTURING IN CURRENT AND CONSTANT (1982) DOLLARS: 1970 TO 1987

[**In billions of dollars, except percent.** For definition of gross national product, see text, section 14. Based on 1972 Standard Industrial Classification]

NA Not available. [1] Estimated data based on *Annual Survey of Manufactures;* see text, section 27. [2] Includes ministrative and auxiliary units, except as noted. [3] Excludes administrative offices and auxiliary units. [4] Includes forms of ganization not shown separately. [5] Includes data for employees of manufacturing establishments engaged in distribution and nstruction work. [6] Data are based on pay periods ending nearest 15th of March, May, August, and November. [7] Adjusted lue added; takes into account (a) value added by merchandising operations (that is, difference between the sales value and cost merchandise sold without further manufacture, processing, or assembly), plus (b) net change in finished goods and work-in-ocess inventories between beginning and end of year. [8] Includes extensive and unmeasurable duplication from shipments tween establishments in the same industry classification. [9] Includes plants under construction and not yet in operation. [10] Beginning 1967, includes data obtained from Federal administrative records.

X Not applicable. [1] Standard Industrial Classification Code; see text, section 27. [2] "All employees" represents the average of "production workers" plus all other employees for the payroll period ended nearest the 15th of March. [3] See footnote 6, table 1264. [4] Manufacturing concerns often reported separately for central offices or auxiliaries which serve the manufacturing company, rather than the general public. Separate reports were obtained from such units if at a different location or if they

No. 1266. CONCENTRATION RATIOS IN MANUFACTURING—SELECTED INDUSTRIES: 1982

[First 31 industries (excluding those classified as "Miscellaneous" or "Not elsewhere classified") as determined by value of shipments in 1982 of $5.5 billion or more. See source for detail]

SIC[1] code	INDUSTRY	Number of companies	Value added by manufacture[2] (mil. dol.)	Total value of shipments[3] (mil. dol.)	PERCENT OF SHIPMENTS, RANKED BY COMPANY SIZE: 4 largest	8 largest	20 largest	50 largest

No. 1270. Capital in Manufacturing Establishments: 1975 to 1987

[**In billions of dollars, except percent.** Minus sign (–) indicates decline. Data refer to privately owned manufacturing establishments and are based on the capital expenditures data from the census of manufactures, the Annual Survey of Manufactures, and the inventory investment component of GNP. For details, see source]

No. 1274. Index of Manufacturing Capacity: 1950 to 1988

[**1977 output=100.** Annual figures are averages of quarterly data. Capacity represents estimated quantity of output, relative to output in 1967, which the *current* stock of plant and equipment in manufacturing industries was capable of producing. Primary processing industries comprise textiles, lumber, paper and pulp, petroleum, rubber, stone, clay, glass, primary metals, fabricated metals, and a portion of chemicals. Advanced processing industries comprise chemical products, food, beverages, tobacco apparel, furniture, printing and publishing, leather, machinery, transportation equipment, instruments, ordnance, and miscellaneous industry groups]

YEAR	Index of capacity	RELATION OF OUTPUT TO CAPACITY (percent): All manufacturing	Primary processing	Advanced processing	YEAR	Index of capacity	RELATION OF OUTPUT TO CAPACITY (percent): All manufacturing	Primary processing	Advanced processing
1950	40	83	89	80	1979	130	85	87	84
1960	60	80	80	81	1980	134	79	78	80
1965	73	90	91	89	1981	139	78	78	78
1970	97	79	81	78	1982	143	70	68	72

No. 1277. U.S. Share of World Exports of Manufactures: 1980 to 1987

[World exports=exports from 15 major trading countries: United States, Austria, Belgium-Luxembourg, Canada, Denmark, France, West Germany, Italy, Japan, Netherlands, Norway, Sweden, Switzerland, and United Kingdom. Percents are calculated from the values of exports of the five commodity groups from each of the 15 countries. Percentage shares are based on dollar values calculated at current exchange rates. Details are reported according to Revision 2 of the United Nations Standard International Trade Classification (SITC)]

PRODUCT CATEGORY	TOTAL (bil. dol.)						PERCENT OF WORLD EXPORTS					
	1980	1983	1984	1985	1986	1987	1980	1983	1984	1985	1986	1987
Total [1]	**147.2**	**136.4**	**148.2**	**150.7**	**155.1**	**179.4**	**16.8**	**17.0**	**17.3**	**16.7**	**14.1**	**13.9**

NO. 1280. EXPORT-RELATED SHIPMENTS AND EMPLOYMENT OF MANUFACTURING ESTABLISHMENTS, 1963 TO 1984, AND BY INDUSTRY, 1984

[The export-related employment data shown do not include the jobs involved in the export of nonmanufactured goods and various services sold to foreign buyers. Thus, jobs in the manufacturing sector that relate to the export of nonmanufactured goods are excluded from the estimates. In addition, all of the indirect exports being reported are domestically produced, that is, they exclude imports. See source for further details on methodology]

NA Not available. [1] Standard Industrial Classification; see text, section 13. [2] Includes total domestic and export shipments for all manufacturing establishments. [3] Includes only the value of manufactured products exported by the producing plants. [4] Includes shipments of components, parts, supplies, etc., used by plants producing the export products. [5] Includes employees of central administrative offices and auxiliaries. [6] Employment is limited to paid employees in manufacturing plants producing the export product. The number of employees related to export shipments was calculated for each establishment, aggregated by industry and by States, and inflated to a level comparable to the plant value of exports reported in the official foreign trade statistics at port value. [7] Manufacturing employment at establishment producing components, parts, supplies, etc for use by plants producing for export. [8] Includes administrative and auxiliary units, not shown separately.

NA Not available. [1] Based on a sample of foundries. [2] Includes shipments "for own use." [3] Includes ductile (nodular
iron castings. [4] Excludes lead die castings for battery plates and parts. [5] Excludes webbing scrap (military ammunition cup
and discs). [6] Copper content. [7] Producers' net shipments consist of total shipments less shipments to other metal mills fo
further fabrication into other forms of mill products. [8] Includes wire. [9] Includes welded tubes.

NO. 1304. ROBOTS, ACCESSORIES, AND COMPONENTS—UNITS SHIPPED AND VALUE: 1985 TO 19

[Based on a survey of all known manufacturers of robots, robot accessories, and components. Shipment value represents the sales price, f.o.b. plant, to the customer or branch to which the products are shipped, net of discounts, allowances, fr charges, and returns. A robot is a reprogrammable multi-functional manipulator designed to move materials, parts, too specialized devices through variable programmed motions for the performance of a variety of tasks. Robots are pres classified in the Standard Industrial Classification (SIC) based on their primary industrial function]

ITEM	UNITS SHIPPED (number)			VALUE OF SHIPMENTS ($1,000)		
	1985	1986	1987	1985	1986	19

Section 28

Domestic Trade and Services

This section presents statistics relating to the distributive trades and service industries. Data shown for the trades, classified by kind of business, and for the various categories of services (e.g., personal, business, repair, hotel) cover sales or receipts, establishments, employees, payrolls, and other items. Also included are data for franchised businesses.

The principal sources of these data are census reports and survey reports of the Bureau of the Census. Data on gross product in trade and service industries appear in the monthly *Survey of Current Business,* issued by the U.S. Bureau of Economic Analysis. Financial data for firms engaged in retail, wholesale, or service activities appear in the annual *Statistics of Income,* published by the Internal Revenue Service.

Censuses.—Censuses of retail trade, wholesale trade, and the service industries have been taken at various intervals since 1929. Beginning with the 1967 Census, legislation provides for a census to be conducted every 5 years (for years ending in "2" and "7").

The establishments covered in the censuses and surveys of business are those classified in 3 divisions defined in the *Standard Industrial Classification Manual, 1972* (see text, section 13). *Retail trade* refers to places of business primarily engaged in selling merchandise for personal or household consumption; *wholesale trade,* to establishments primarily engaged in selling goods to dealers and distributors for resale or to purchasers who buy for business and farm uses; and *services,* to establishments primarily engaged in providing a wide range of services for individuals and for businesses.

Data from the 1958 Census of Retail Trade exclude nonemployer establishments which had annual receipts of less than $2,500. Beginning with the 1963 censuses, nonemployer establishments which did not operate the entire year were included if, during the period they operated, their receipts were at a rate which would have reached specified annual totals had they operated the entire year. Beginning with the 1972 Census of Retail Trade, nonemployer establishments are included if, on an annual basis, they reported sales volume of at least $1,000. The Census of Wholesale Trade excludes establishments with no paid employees. Beginning in 1977, sales taxes and finance charges are excluded in sales (or receipt) figures of the three censuses.

In 1977 the Census of Service Industries included for the first time health services (except dental laboratories), educational services, social services, membership organizations, and others performing a professional or scientific service (except engineering, architectural, and surveying services). Religious organizations and private households were not covered. While most of these industries were again included in the 1982 census, some were not. In 1982, data were not collected for hospitals, elementary and secondary schools, colleges and universities, labor unions and similar organizations, and political organizations. Also in 1977, tax-exempt service industries were covered for the first time.

The Census of Retail Trade beginning in 1977, excludes nonemployer direct sellers. In 1982, the census treated each leased department in a store as a separate establishment and classified it according to the kind-of-business it conducted. In prior years, data for leased departments were consolidated with the data for stores in which they were located.

In the retail and service censuses prior to 1982, combined data for all establishments (nonemployer firms plus establishments of employer firms) were presented for selected kind-of-business classifications. In 1982 these data could not be published by kind-of-business because many nonemployer firms were miscoded by the Internal Revenue Service (IRS) into miscellaneous categories rather than specific kind-of-business. For retail trade and services, total establishment summary data are available but kind-of-business detail are available only on a national level from the Bureau.

Current surveys.—Current sample surveys conducted by the Bureau of the Census cover various aspects of the retail and wholesale trade and selected service industries. Its *Monthly Retail Trade Report* contains monthly estimates of sales, inventories, and sales of organizations operating 11 or more retail stores (see table 1330), for the United States, by kind of business. In addition, monthly retail sales data for census regions and divisions, large States, metropolitan areas, cities are included. Annual figures on sales, yearend inventories, and sales/inventory ratios, by of business, appear in the *Annual Retail Trade Report*.

Statistics from the Bureau's monthly wholesale trade survey include national estimates of chant wholesalers' sales, inventories, and stock-sales ratios by major summary groups—du and nondurable—and selected kinds of businesses. Merchant wholesalers are those whole who take title to the goods they sell (e.g., jobbers, exporters, importers, major distributors). T data, based on reports submitted by a sample of firms, appear in the *Monthly Wholesale T Report*. Annual figures on sales, sales-inventory ratios, and yearend inventories appear in *Annual Wholesale Trade Report*.

The *Service Annual Survey* provides annual estimates of receipts for selected service estab ments for the United States as a whole.

For the current sample survey programs, retail trade coverage is the same as for the cen wholesale trade coverage is limited to merchant wholesalers; and selected services coverage less inclusive than the census.

Estimates obtained from annual and monthly surveys are based on sample data and are not pected to agree exactly with results that would be obtained from a complete census of all est lishments. Data include estimates for establishments not reporting.

Statistical reliability.—For a discussion of statistical collection and estimation, sampling pro dures, and measures of statistical reliability applicable to Census Bureau data, see Appendix cal Statistics of the United States, Colonial Times to 1970*. See Appendix IV.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Histo*

No. 1328. Retail Trade Sales—Summary: 1970 to 1987

[Data reflect use of a new sample of retail stores, based on kind-of-business classifications from the 1982 Census of Retail Trade, which was selected and implemented during 1986. Sales and inventory estimates from the old sample were converted to a level comparable with the new sample. Sales and inventories for leased departments and concessions are tabulated in the kind-of-business category of the leased department or concession. Based on Current Business Survey, see Appendix III. Minus sign (-) indicates decrease. See also *Historical Statistics, Colonial Times to 1970*, series T 245, 246, and 255]

NA Not available. [1] Estimated. [2] Includes nonfood items; 1972 data include sales taxes. [3] A grocery store, primarily self-service in operation, providing a full range of departments, and having at least $2.5 million in annual sales in 1985 dollars. [4] A small grocery store selling a limited variety of food and nonfood products, typically open extended hours. [5] Primarily engaged in the retail sale of a single food category such as meat and seafood stores and retail bakeries.

NO. 1333. SUPERMARKETS—NUMBER AND SALES, BY TYPE OF FORMAT: 1980 TO 1986

[For definition of supermarket, see footnote 3, table 1332]

SUPERMARKET FORMAT	NUMBER			SALES (bil. dol.)			PERCENT DISTRIBUTION			
							Number		Sales	
	1980	1984	1986	1980	1984	1986	1980	1986	1980	198
Supermarkets, total	**26,321**	**26,947**	**27,005**	**157.0**	**192.8**	**210.5**	**100.0**	**100.0**	**100.0**	**100.0**
Conventional	21,009	17,644	17,169	114.7	95.8	99.8	79.8	63.6	73.1	47.4
Superstore [1]	3,150	4,608	4,994	27.8	54.6	57.9	12.0	18.5	17.7	27.5
Warehouse [2]	1,670	3,584	3,332	6.6	22.9	25.9	6.3	12.3	4.2	12.3
Combination food and drug [3]	475	943	1,133	6.3	15.4	16.8	1.8	4.2	4.0	8.0

Hypermarket [5]	10	60	80	(NA)	.8	3.4	(Z)	.3	(NA)	1.6

NA Not available. Z Less than .05 percent. [1] Contains greater variety of products than conventional supermarkets, including specialty and service departments, and considerable nonfood (general merchandise) products. [2] Contains limited product variety and fewer services provided, incorporating case lot stocking and shelving practices. [3] Contains a pharmacy, a nonprescription drug department, and a greater variety of health and beauty aids than that carried by conventional supermarkets. [4] A larger warehouse store that offers expanded product variety and often service meat, deli, or seafood departments. [5] A very large store offering a greater variety of general merchandise—like clothes, hardware, and seasonal goods—and personal care products than other grocery stores.

No. 1335. Shopping Centers—Number, Gross Leasable Area, and Retail Sales, by Gross Leasable Area: 1986 and 1987

[As of **December 31.** A shopping center is a group of architecturally unified commercial establishments built on a site which is planned, developed, owned and managed as an operating unit related in its location, size, and type of shops to the trade area that the unit serves. The unit provides on-site parking in definite relationship to the types and total size of the stores. The data base attempts to include all centers with 30 or more stores. Estimates are based on a sample of data available on shopping center properties available; for details, contact source]

YEAR	Total	GROSS LEASABLE AREA (sq. ft.)					
		Less than 100,001	100,001-200,000	200,001-400,000	400,001-800,000	800,001-1,000,000	More than 1 million

No. 1338. Domestic and International Franchising—Summary: 1970 to 1988

[Franchising is a form of marketing or distribution in which a parent company customarily grants an individual or a company the right, or privilege, to do business in a prescribed manner over a certain period of time in a specified place. The parent company is termed the franchisor; the receiver of the privilege the franchisee; and the right, or privilege, the franchise]

No. 1351. The Lodging Industry, by Type of Establishment—Summary: 1985 to 1987

[An economy lodging establishment offers clean, standard-sized, fully-furnished modern rooms at usually $10.00 to $20.00 per night below the rate of typical full-service motor hotels. Their customers do not need food facilities, banquet rooms or meeting facilities, indoor recreation areas, or entertainment. An All-suite hotel doesn't have rooms, only suites. A suite differs from a hotel room by several characteristics. Generally, there is a separate bedroom, and guest amenities often include "extras" such as a wet bar or microwave, and in some cases a full-kitchen. A resort hotel is a lodging facility providing an environment conducive to leisure and recreation and an ambiance of isolation/destination while providing a full range of leisure oriented amenities. Based on Annual Surveys of Lodging Establishments. Covers approximately 800 full-service, 300 economy, 60 all suite, and 180 resort establishments in 1986. All figures except percents are medians. For definition of median, see Guide to Tabular Presentation]

ITEM	FULL-SERVICE		ECONOMY		ALL-SUITE		RESORT	
	1986	**1987**	**1986**	**1987**	**1985**	**1986**	**1986**	**1987**

Section 29

Foreign Commerce and Aid

This section presents data on the flow of goods, services, and capital between the United States and other countries; changes in official reserve assets of the United States; international investments; foreign assistance programs; and import duties.

The Bureau of Economic Analysis publishes current figures on U.S. international transactions and the U.S. international investment position in its monthly *Survey of Current Business.* Figures for earlier periods are presented in *Balance of Payments—Statistical Supplement,* 1963 revised edition, in the periodic *Foreign Grants and Credits by the United States Government,* and in the June issues of the *Survey of Current Business.* Statistics for the foreign aid programs are presented by the Agency for International Development (AID) in its annual *U.S. Overseas Loans and Grants and Assistance from International Organizations;* and by the Department of Agriculture in its *Foreign Agricultural Trade of the United States.*

The principal source of merchandise import and export data is the Bureau of the Census. Current data are presented monthly in Report FT 135, *U.S. General Imports, Schedule A: Commodity by Country;* Report FT 410, *U.S. Exports, Schedule E: Commodity by Country;* and Report FT 990, *Highlights of U.S. Export and Import Trade.* The *Bureau of the Census Catalog* and the *Guide to Foreign Trade Statistics* lists the Bureau's monthly and annual reports in this field. In addition, the International Trade Administration and the Bureau of Economic Analysis present summary as well as selected commodity and country data for U.S. foreign trade in the *Overseas Business Reports* and the *Survey of Current Business,* respectively. The merchandise trade data in the latter source include balance of payments adjustments to the Census data. The Treasury Department's *Monthly Treasury Statement of Receipts and Outlays of the United States Government* contains information on import duties.

International accounts.—The international transactions tables (Nos. 1354-1356) show, for given time periods, the transfer of goods, services, grants, and financial assets and liabilities between the United States and the rest of the world. The international investment position table (No. 1357) presents, for specific dates, the value of U.S. investments abroad and of foreign investments in the United States. The movement of foreign and U.S. capital as presented in the balance of payments is not the only factor affecting the total value of foreign investments. Among the other factors are changes in the valuation of assets or liabilities, including changes in prices of securities, defaults, expropriations, and write-offs.

Direct investment abroad means the ownership or control, directly or indirectly, by one person of 10 percent or more of the voting securities of an incorporated business enterprise or an equivalent interest in an unincorporated business enterprise. Direct investment position is the value of U.S. parents' claims on the equity of, and receivables due from, foreign affiliates, less foreign affiliates' receivables due from their U.S. parents. Income consists of parents' shares in the earnings of their affiliates plus net interest received by parents on intercompany accounts, less withholding taxes on dividends and interest.

Foreign aid.—Foreign assistance is divided into three major categories—grants (military supplies and services and other grants), credits, and other assistance (through net accumulation of foreign currency claims from the sale of agricultural commodities). *Grants* are transfers for which no payment is expected (other than a limited percentage of the foreign currency "counterpart" funds generated by the grant), or which at most involve an obligation on the part of the receiver to extend aid to the United States or other countries to achieve a common objective. *Credits* are loan disbursements or transfers under other agreements which give rise to specific obligations to repay, over a period of years, usually with interest. All known returns to the U.S. Government stemming from grants and credits (reverse grants, returns of grants, and payments of principal) are taken into account in net grants and net credits, but no allowance is made for interest or commissions. *Other assistance* represents the transfer of U.S. farm products in exchange for foreign currencies (plus, since enactment of Public Law 87-128, currency claims from principal and interest collected on credits extended under the farm products program), *less* the Government's disbursements of the currencies as grants, credits, or for purchases. The net acquisition of currencies represents net transfers of resources to foreign countries under the agricultural programs, in addition to those classified as grants or credits.

Figures as published in the *Foreign Grants and Credits* series are not identical with figures shown for Government unilateral transfers and capital in the balance of payments, mainly because of differences in treatment of particular items by the two sets of accounts. Such items include contributions to the multilateral construction program of the North Atlantic Treaty Organization, Government investments in certain productive enterprises abroad, Government receipts on funded claims, and net changes in foreign currency holdings resulting from transactions other than those under the farm products program, such as collections of principal and interest and purchases for dollars.

The basic instrument for extending military aid to friendly nations has been the Mutual Defense Assistance Program authorized by the Congress in 1949. Prior to 1952, economic and technical aid was authorized in the Foreign Assistance Act of 1948, the 1950 Act for International Development, and other legislation which set up programs for specific countries. In 1952, these economic, technical, and military aid programs were combined under the Mutual Security Act, which in turn was followed by the Foreign Assistance Act passed in 1961. Appropriations to provide military assistance were also made in the Department of Defense Appropriation Act (rather than the Foreign Assistance Appropriation Act) beginning in 1966 for certain countries in Southeast Asia and in other legislation concerning programs for specific countries (such as Israel). Figures on activity under the Foreign Assistance Act as reported in the *Foreign Grants and Credits* series differ from data published by AID or its immediate predecessors, due largely to differences in reporting, timing, and treatment of particular items.

Exports.—The Bureau of the Census compiles export data primarily from Shipper's Export Declarations required to be filed with customs officials for shipments leaving the United States. They include U.S. exports under mutual security programs and exclude shipments to U.S. Armed Forces for their own use.

The value reported in the export statistics is generally equivalent to a free alongside ship (f.a.s.) value at the U.S. port of export, based on the transaction price, including inland freight, insurance, and other charges incurred in placing the merchandise alongside the carrier at the U.S. port of exportation. This value, as defined, excludes the cost of loading merchandise aboard the exporting carrier and also excludes freight, insurance, and any other charges or transportation and other costs beyond the U.S. port of exportation. The country of destination is defined as the country of ultimate destination or country where the merchandise is to be consumed, further processed, or manufactured, as known to the shipper at the time of exportation. When ultimate destination is not known, the shipment is statistically credited to the last country to which the shipper knows the merchandise will be shipped in the same form as exported.

For certain low-valued shipments, the export statistics since July 1953 include estimates based upon selected samples of such shipments with lower and upper value limits of the sampled shipments varying (Canada excepted) from $100-$499 for July 1953-September 1969, $251-$499 for October 1969-February 1979, and $501-$999, for March 1979-June 1981. For July 1981-December 1984, the statistics for countries other than Canada reflect fully compiled data for shipments valued over $500. For Canada, the upper value limit was $1,999 during the period January 1963-December 1984, and lower value limits were raised to $251 and $501 in October 1969 and March 1979, respectively. Beginning 1985, data for low-valued exports to all countries are estimated using factors based on the ratios of low-valued shipments to individual country totals. From January, 1985 through December 1986, data are estimated for all shipments valued under $1,001. Effective January 1987, data are estimated for shipments valued under $1,501. Shipments valued under $1,501 represent slightly less than 2.5 percent of the total value of exports.

Beginning January 1978, the Export Classification Schedule was based upon Schedule E, Standard International Trade Classification, Revision 2. This revision affects the comparability of some export statistics.

Imports.—The Bureau of the Census compiles import data from various customs forms required to be filed with customs officials. From 1974-1981, data on import values were presented on three bases: The transaction values f.a.s. (free alongside ship) at the foreign port of export, the c.i.f. (cost, insurance, and freight), and the previously reported customs import value (as appraised by the U.S. Customs Service in accordance with legal requirements of the Tariff Act of 1930, as amended). This latter valuation, primarily used for collection of import duties, frequently did not reflect the actual transaction value. Beginning 1982, import data are based on customs values, i.e., the price paid by the buyer to the seller in accordance with the 1979 Trade Agreement Act amendments to the 1930 Tariff Act. For the c.i.f. imports, the new customs value was substituted for the arms-length transaction value used for 1981 and earlier years. The f.a.s. transaction values were discontinued as of January 1982. Country of origin is defined as country where the merchandise was grown, mined, or manufactured. If country of origin is unknown, country of shipment is reported.

Imports are classified either as "General imports" or "Imports for consumption." General imports are a combination of entries for immediate consumption, entries into customs bonded warehouses, and entries into U.S. Foreign Trade Zones, thus generally reflecting total arrivals of merchandise. Imports for consumption are a combination of entries for immediate consumption, withdrawals from warehouses for consumption, and entries of merchandise into U.S. customs territory from U.S. Foreign Trade Zones, thus generally reflecting the total of the commodities entered into U.S. consumption channels.

Since July 1953, the import statistics include estimates, not classified by commodity, for certain low-valued shipments. For July 1953-July 1965, entries valued under $100, in general, were estimated, while entries valued under $251 have been estimated for the period July 1965-December 1984. Since January 1985, import statistics include estimates for shipments valued under $1,001. The estimated low-valued shipments generally amount to about 4 percent of the import total.

Area coverage.—Except as noted, the geographic area covered by the export and import trade statistics is the United States Customs area (includes the 50 States, the District of Columbia and Puerto Rico), the U.S. Virgin Islands (effective January 1981), and U.S. Foreign Trade Zones (effective July 1982). Data for selected tables and total values for 1980, have been revised to reflect the U.S. Virgin Islands' trade with foreign countries, where possible.

Statistical reliability.—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970.* See Appendix IV.

NO. 1361. U.S. BUSINESSES ACQUIRED OR ESTABLISHED BY FOREIGN DIRECT INVESTORS, BY INDUSTRY OF U.S. BUSINESS ENTERPRISE: 1986 AND 1987

[Foreign direct investment is the ownership or control, directly or indirectly, by one foreign individual branch, partnership, association, trust, corporation, or government of 10 percent or more of the voting securities of a U.S. business enterprise or an equivalent interest in an unincorporated one. Data represent number and full cost of acquisitions of existing U.S. business enterprises, including business segments or operating units of existing U.S. business enterprises and establishments of new enterprises. Investments may be made by the foreign direct investor itself, or indirectly by an existing U.S. affiliate of the foreign direct investor. Covers investments in U.S. business enterprises with assets of over $1 million, or ownership of 200 acres of U.S. land]

No. 1363. U.S. Investment Position Abroad, by Country: 1980 to 1987

[In millions of dollars. Direct investments represent private enterprises in one country owned or controlled by investors in another country or in the management of which foreign investors have an important role. Negative position occurs when U.S. parent company's liabilities to the foreign affiliate are greater than its equity in, and loans to the foreign affiliate. See also *Historical Statistics, Colonial Times to 1970*, series U 41–46]

Sales of farm products	813	11,170	3,013	114	4	1	10	49	49
Second-stage operations [11]	-	329	3,875	1,113	86	78	87	84	43
Less: Currencies disbursed	*272*	*8,696*	*8,177*	*1,514*	*98*	*72*	*89*	*129*	*108*
Economic grants and credits to purchasing country	182	6,863	6,236	180	25	5	2	10	15
Other uses	90	1,833	1,940	1,334	73	67	88	119	93

- Represents zero. Z Less than $500,000. [1] For details, see table 1365. [2] Developed countries include Australia, Canada, Japan, New Zealand, South Africa, all countries listed under "Western Europe" in table 1365, except Portugal, Spain (through 1981), Yugoslavia, and Malta, and all countries listed under "Eastern Europe" in table 1365. Developing countries include all other countries listed in table 1365 (including Spain through 1981). [3] Foreign Assistance Act of 1961 (P.L. 87-195), as amended. Also includes predecessor and related programs. [4] Includes military assistance under Dept. of Defense Appropriation Act, 1966 (P.L. 89-394) and later acts. [5] Includes funds made available under Public Law 93-199 and subsequent legislation to release Israel from its contractual liability to pay for defense articles and services purchased under other legislation. [6] Net new grants are not adjusted for settlements for postwar relief and other grants under agreements, and net new credits exclude prior grants converted into credits, which were as follows: 1946-55, $1,463 million; 1956-65, $491 million; 1972, $994 million. Repayments on these settlements are included in net new credits. [7] Agricultural Trade Development and Assistance Act. [8] Outstanding credits on Dec. 31, 1987, totaled $69,975 million representing net credits extended since organization of Export-Import Bank, Feb. 12, 1934, less chargeoffs and net adjustments due to exchange rates ($2,002 million), and excluding World War I debts. The amount repayable in dollars at U.S. Government option was $68,382 million; the remainder was repayable in foreign currencies, commodities, or services, at the option of the borrowers. [9] Commodity Credit Corporation Charter Act. [10] Equivalent value of currencies still available to be used, including some funds advanced from foreign governments and after loss by exchange rate fluctuations ($1,586 million), was $187 million on Dec. 31, 1987. [11] Includes foreign currencies acquired from triangular trade operations and principal and interest collections on credits, originally extended under P.L. 83-480, which—since enactment of P.L. 87-128—are available for the same purposes as P.L. 83-480 currencies.

NO. 1366. U.S. FOREIGN ECONOMIC AND MILITARY AID PROGRAMS: 1946 TO 1987

[**In millions of dollars.** For years ending **June 30** except, beginning **1977**, ending **Sept. 30**. Economic aid shown here
total U.S. economic aid—not just aid under Foreign Assistance Act. Major components in recent years include AID,
Peace, Peace Corps, and paid-in subscriptions to international financial institutions, such as IBRD, and IDB. Cumulative
1946–1987 are true totals net of deobligation; annual figures however, are gross unadjusted program figures. Military aid
Military Assistance Program (MAP) grants, foreign military credit sales, service-funded programs, and excess defense

No. 1369. U.S. Exports and Imports of Merchandise: 1960 to 1987

[**In billions of dollars, except percent.** Includes silver ore and bullion; beginning 1974, includes shipments of nonmonetary gold. Data may differ from those shown in tables 1345, 1349, and 1350, due to revisions and inclusion of the Virgin Islands since 1974. For basis of dollar values, see text, section 29. See also *Historical Statistics, Colonial Times to 1970*, series U 190-196 and U 207-212]

No. 1372. U.S. Exports, Imports, and Merchandise Trade Balance, by Continent, Area, and Country: 1980 to 1987

[**In millions of dollars, except percent.** Includes silver ore and bullion. Area, continent, and individual country totals include exports of special category commodities, if any. Data include nonmonetary gold; beginning 1984, data include trade of Virgin Islands with foreign countries, see footnote 2 for exception. Minus sign (–) denotes an excess of imports over exports. See *Historical Statistics, Colonial Times to 1970*, series U 317-352, for selected countries]

– Represents zero. Z Less than $500,000. [1] Imports: 1980, f.a.s basis; other years, customs value basis. Exports are f.a.s. value. [2] Includes revisions not carried to area values; therefore, area values will not add to total. [3] Developed countries include Canada, Western Europe, Japan, Australia, New Zealand, and South Africa; developing countries include rest of the world excluding Communist areas in Europe and Asia. Assignment of countries generally follows that made by United Nations. (See table 1403.) [4] OECD=Organization of Economic Cooperation and Development. [5] As of 1981, Greece, became a member of EEC; as of 1986 Spain and Portugal became members of EEC. For consistency, data for all years are shown on same basis.

NA Not available. Z Less than $50 million. [1] Totals shown for exports reflect the value of estimated parcel post and Special Category shipments which are not distributed by customs region/district. Beginning 1984, the value of bituminous coal exported through Norfolk, VA; Charleston, SC; and Mobile, AL is reflected in the total but not distributed by region/district. Total bituminous coal exports for the 3 customs districts were valued at $2.3 billion in 1984, $2.6 billion in 1985, $2.3 billion in 1986 and $1.9 billion in 1987. Totals shown for imports include estimated shipments not distributed by region/district. [2] Beginning 1984, excludes exports of bituminous coal.

NO. 1376. DOMESTIC EXPORTS, BY SELECTED COMMODITY GROUPS: 1970 TO 1987

[**In millions of dollars.** Totals and subtotals include data for commodities not shown separately. Beginning 1975, exports include nonmonetary gold. Commodity data beginning 1980 are not strictly comparable with previous years due to changes in export classifications; see source for changes. Beginning 1980, includes trade of Virgin Islands with foreign countries (see footnote 1 for exception). "N.e.c." means not elsewhere classified. See also *Historical Statistics, Colonial Times to 1970*, series U 274-294]

[1] Includes revisions not carried to commodity groups; therefore, commodity groups will not add to total. [2] Beginning 1980, includes pulpwood chips, formerly classified in "Other manufactured goods" under "Wood and manufactures." [3] Beginning 1980, includes rubber materials, formerly classified in "Other manufactured goods" under "Rubber manufactures." [4] Includes parts for tractors. [5] Beginning 1980, includes photocopy apparatus, formerly classified in "Other manufactured goods" under "Photographic and motion picture equipment." [6] Excludes parts for tractors. [7] Excludes pig iron. [8] Beginning 1980, electric measuring and controlling instruments are included in "Other manufactured goods" under "Professional, scientific, and controlling instruments"; formerly classified under "Machinery." [9] Beginning 1984, includes exports valued $10,000 and under reported without a valid schedule B commodity number; beginning 1985, includes estimates of export shipments valued under $1,001.

No. 1377. General Imports, by Selected Commodity Groups: 1970 to 1987

[In millions of dollars. Imports are customs value basis for years 1982 to present; f.a.s. (free alongside ship) value basis prior to 1982. Totals and subtotals include value of commodities not shown separately. Beginning 1960, includes trade of Virgin Islands with foreign countries. "N.e.c." means not elsewhere classified. See also *Historical Statistics, Colonial Times to 1970*, series U 295-316]

[1] Value on a cost, insurance, and freight basis: cost (to the U.S. importer) of commodities at port of exportation plus insurance and freight to U.S. customs port of entry. 1970 is estimated. [2] Canned, cooked, and boned. [3] Prior to 1980, alumina is included under chemicals; thereafter, classified in crude materials. [4] Materials of lime, cement, and clay. [5] Excludes narrow or special fabrics. [6] Beginning 1980, electric measuring and controlling instruments are included in "Other manufactured goods" under "Professional, scientific, photographic, and controlling instruments"; prior to 1980, classified under "Machinery." [7] Beginning 1980, sound recorders included in "Machinery."

Section 30

Outlying Areas

This section presents summary economic and social statistics for Puerto Rico, Virgin Islands, Guam, American Samoa, and the Northern Mariana Islands.

Primary sources are the decennial censuses of population and housing, and the censuses of agriculture, business, manufactures, and construction (taken every five years) conducted by the Bureau of the Census; the annual *Vital Statistics of the United States*, issued by the National Center for Health Statistics; and the annual *Income and Product* of the Puerto Rico Planning Board, San Juan.

Jurisdiction.—The United States gained jurisdiction over these areas as follows:

> The islands of *Puerto Rico* and *Guam*, surrendered by Spain to the United States in October 1898, were ceded to the United States by the Treaty of Paris, ratified in 1899. Puerto Rico became a Commonwealth on July 25, 1952, thereby achieving a high degree of local autonomy under its own constitution. The *Virgin Islands*, comprising 50 islands and cays, was purchased by the United States from Denmark in 1917. *American Samoa*, a group of 7 islands, was acquired by the United States in accordance with a convention among the United States, Great Britain, and Germany, ratified in 1900 (Swains Island was annexed in 1925).
>
> By an agreement approved by the Security Council and the United States the Northern Mariana Islands, previously under Japanese mandate, was administered by the United States between 1947 and 1986 under the United Nations trusteeship system. The Northern Mariana Islands became a Commonwealth in 1986.

For a brief summary of U.S. territorial development, see table 332.

Censuses.—Because characteristics of the outlying areas differ, the presentation of census data for them is not uniform. The 1960 Census of Population covered all of the places listed above except the Northern Mariana Islands (their census was conducted in April 1958 by the Office of the High Commissioner), while the 1960 Census of Housing also excluded American Samoa. The 1970 and 1980 Censuses of Population and Housing covered all five areas. The 1959, 1969, and 1978 Censuses of Agriculture covered Puerto Rico, American Samoa, Guam, and the Virgin Islands; the 1964, 1974, and 1982 censuses covered the same areas except American Samoa; and the 1978 census included the Northern Mariana Islands. Beginning in 1967, Congress authorized the economic censuses, to be taken at 5-year intervals, for years ending in 2 and 7. Prior economic censuses were conducted in Puerto Rico for 1954, 1958, and 1963, and in Guam and the Virgin Islands for 1958 and 1963. In 1967, the census of construction industries was added for the first time in Puerto Rico; in 1972 Virgin Islands and Guam were covered. Beginning in 1982, the economic censuses covered the Northern Mariana Islands.

Information in other sections.—In addition to the statistics presented in this section, other data are included as integral parts of many tables showing distribution by States in various sections of the *Abstract*. See "Outlying areas of the United States" in the index. For definition and explanation of terms used, see section 1, Population; section 4, Education; section 23, Agriculture; section 26, Construction and Housing; section 27, Manufactures; and section 28, Domestic Trade and Services.

NO. **1380.** ESTIMATED RESIDENT POPULATION, BY AREA: 1950 TO 1987

[**In thousands.** As of July 1. Includes estimates of Armed Forces stationed in area]

AREA	1950	1960	1970	1975	1980	1985	1986	1987
Puerto Rico	2,218	2,362	2,716	2,933	3,206	3,282	3,273	3,292
American Samoa	19	20	27	30	32	36	37	38
Guam	60	66	86	102	107	124	127	130
Virgin Islands	27	32	63	94	98	111	110	106
Northern Mariana Islands [1]	(NA)	(NA)	12	15	17	19	20	20

NA Not available. [1] Data consistent with apportionment census of September 1973 which showed a total population of 14,333 for the Marianas.

NO. 1381. ESTIMATES OF COMPONENTS OF POPULATION CHANGE, BY AREA: 1970 TO 1980 AND 1980 TO 1987

[**In thousands, except percent.** Resident population, including Armed Forces stationed in area. See table 1382 for population totals. Minus sign (−) indicates decrease. For explanation of methodology, see source]

AREA	APRIL 1, 1970 TO APRIL 1, 1980					APRIL 1, 1980 TO JULY 1, 1987				
	Net change		Births	Deaths	Net migration [1]	Net change		Births	Deaths	Net migration [1]
	Number	Percent				Number	Percent			
Puerto Rico	484.5	17.9	744.0	193.7	−65.9	95.0	3.0	482.0	160.0	−227.0
American Samoa	5.1	18.9	10.6	1.4	−4.1	6.1	19.0	9.6	1.1	−2.4
Guam	21.0	24.7	30.7	4.1	−5.7	24.4	23.1	22.5	3.2	5.2
Virgin Islands	34.1	54.6	26.6	5.0	12.5	9.5	9.8	17.7	3.8	−4.4
Northern Mariana Islands [2]	4.6	37.5	5.3	.9	(3)	3.5	21.1	4.9	.8	(3)

[1] Includes error of closure (the amount necessary to make the components of change add to the net change between censuses). [2] See footnote 1, table 1380. [3] Migration is derived as a residual. Because part of the residual migration in these areas reflects under-registration of vital statistics, migration figures are not shown.

Section 31

Comparative International Statistics

This section presents statistics for the world as a whole and for many countries on a comparative asis with the United States. Selected data are shown for area and population, births and deaths, ocial and industrial indicators, finances, agriculture, communication, and military affairs.

Statistics of the individual nations may be found primarily in official national publications, general- in the form of yearbooks, issued by most of the nations at various intervals in their own national nguages, expressed in their own or customary units of measure. (For a listing of selected publica- ons, see Guide to Sources.) For handier reference, especially for international comparisons, the tatistical Office of the United Nations compiles data as submitted by member countries and issues number of international summary publications, generally in English and French. Among these are e *Statistical Yearbook;* the *Demographic Yearbook;* the *Yearbook of International Trade Statistics;* e *Yearbook of National Accounts Statistics: Vol. II, International Tables; Population and Vital Sta- stics Reports* (quarterly); the *Monthly Bulletin of Statistics;* and *Energy Statistics Yearbook.* Spe- alized agencies of the United Nations also issue international summary publications on agricultur- , labor, health, and education statistics. Among these are the *Production Yearbook* and *Trade earbook* issued by the Food and Agriculture Organization, the *Yearbook of Labour Statistics* sued by the International Labour Office, *World Health Statistics* issued by the World Health Orga- ization, and the *Statistical Yearbook* issued by the Educational, Scientific, and Cultural Organiza- on.

The Bureau of the Census, in *Country Demographic Profiles*, series ISP-30, presents data on indi- idual countries for both a recent census year and the current period; and in the *World Population rofile* series, estimates of basic demographic measures for countries and regions of the world. The *nternational Population Statistics Reports*, series P-90 and P-91, issued by the Bureau of the ensus, also present population figures for many foreign countries. Detailed population statistics re also available from the Bureau of the Census' computerized data system, the International Data ase.

The U.S. Arms Control and Disarmament Agency and the International Monetary Fund (IMF) also compile data on international statistics. In its *World Military Expenditures and Arms Transfers*, pub- shed annually, the Arms Control and Disarmament Agency presents data on various economic in- icators, as well as basic military data. Among the topics presented have been military expendi- ures, gross national product, imports and exports, and armed forces, by region and/or country. The MF publishes a series of reports relating to financial data. These include *International Financial tatistics, Direction of Trade*, and *Balance of Payments Yearbook*, published in English, French, nd Spanish.

Statistical coverage, country names, and classifications.—Problems of space and availability f data limit the number of countries and the extent of statistical coverage shown. The list of coun- ries included is based almost entirely on a list of sovereign nations, dependencies, and areas of pecial sovereignty published by the U.S. Department of State in *Status of the World's Nations.* ountry names are shown here as specified in that publication. In the few cases where a lack of comparability exists between State Department and United Nations' terminology, the State Depart- ment's preferences are used.

The countries and regions in table 1402 are classified as either "more developed" or "less de- eloped," according to a *regional* classification system used by the Census Bureau in its *World opulation: 1983.* The system is based on the assumption that, within regions, levels of such fac- ors as industrial development, literacy rate, gross reproduction rate, per capita income, etc., are omewhat constant. "More developed" countries comprise Japan, Australia, New Zealand, the Soviet Union, and those countries in Northern America and Europe. All others are "less devel- oped".

The population estimates and projections used in tables 1402-1405 were prepared by the Census Bureau. For each country, the data on population, by age and sex, fertility, mortality, and international migration were evaluated, and, where necessary, adjusted for inconsistencies and errors i the data. In most instances, comprehensive projections were made by the component method, resulting in distributions of the population by age and sex, and requiring an assessment of probable future trends of fertility, mortality, and international migration.

Economic associations.—The Organization for European Economic Co-operation (OEEC), a regional grouping of Western European countries established in 1948 for the purpose of harmonizing national economic policies and conditions, was succeeded on September 30, 1961, by the Organization for Economic Cooperation and Development (OECD). The member nations of the OECD are Australia, Austria, Belgium, Canada, Denmark, Finland, France, Greece, Iceland, Ireland, Italy, Japan, Luxembourg, the Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, the United Kingdom, the United States, and West Germany, plus Yugoslavia in special status category.

Quality and comparability of the data.—The quality and comparability of the data presented here are affected by a number of factors:

(1) The year for which data are presented may not be the same for all subjects for a particular country, or for a given subject for different countries, though the data shown are the most recent available. All such variations have been noted. The data shown are for calendar years except as otherwise specified.

(2) The bases, methods of estimating, methods of data collection, extent of coverage, precision of definition, scope of territory, and margins of error may vary for different items within a particular country, and for like items for different countries. Footnotes and headnotes to the tables give a few of the major time-period and coverage qualifications attached to the figures; considerably more detail is presented in the source publications. Many of the measures shown are, at best, merely rough indicators of magnitude.

(3) Figures shown in this section for the United States may not always agree with figures shown in the preceding sections. Disagreements may be attributable to the use of differing original sources, a difference in the definition of geographic limits (the 50 States, conterminous United States only, or the United States including certain outlying areas and possessions), or to possible adjustments made in the United States figures by the United Nations or other sources in order to make them more comparable with figures from other countries.

International comparisons of national accounts data.—In order to compare national accounts data for different countries, it is necessary to convert each country's data into a common unit of currency, usually the U.S. dollar. The market exchange rates which are often used in converting national currencies do not necessarily reflect the relative purchasing power in the various countries. For example, using table 1412, it should not be concluded that the United Kingdom's individual standard of living in 1987 was only 64 percent of that of the U.S., as the statistics may imply. It is obviously necessary that the goods and services produced in different countries should be valued consistently if the differences observed are meant to reflect real differences in the volumes of goods and services produced. The use of purchasing power parities (see table 1413) instead of exchange rates is intended to achieve this objective.

The method used to present the data shown in table 1413 is to construct volume measures directly by revaluing the goods and services sold in different countries at a common set of international prices. By dividing the ratio of the gross domestic products of two countries expressed in their own national currencies by the corresponding ratio calculated at constant international prices, it is possible to derive the implied purchasing power parity (PPP) between the two currencies concerned. PPP's show how many units of currency are needed in one country to buy the same amount of goods and services which one unit of currency will buy in the other country. For further information, see *National Accounts, Main Aggregates*, volume I, issued annually by the Organization for Economic Cooperation and Development, Paris, France.

No. 1402. World Population and Vital Statistics, by Continent and Region, 1970 to 1988, and Projections, 1990 and 2000

[Crude birth rate: Number of births during 1 year per 1,000 persons (based on midyear population). Crude death rate: Number of deaths during 1 year per 1,000 persons (based on midyear population). Total fertility rate: Average number of children that would be born per woman if all women lived to the end of their childbearing years and, at each year of age, they experienced the birth rates occurring in the specified year. For explanation of "more developed" and "less developed" categories, see text, section 31]

No. 1403. Population and Area, by Region and Country, 1980 and 1988, and Projections, 1990 and 2000

[Population data generally are de facto figures for the present territory. Population estimates were derived from information available as of mid-1988. See table 1405 for country components of regions. See text, section 31, for general comments concerning the data. For details of methodology, coverage, and reliability, see sources. Minus sign (-) indicates decrease]

No. 1405. Vital Statistics, 1988, and Projections, 2000—Selected Countries

[Covers countries with 5 million or more population in 1988. AFR—Africa, EAS—East Asia, SAS—South Asia, CAR—Carribbean, MAM—Middle America, SAM—South America, NAM—North America, EUR—Europe, SOV—Soviet Union, OCE—Oceania. For region data, see table 1402. Data compiled from the International Data Base; see text, section 31]

No. 1406. Population of the World's 100 Largest Urban Areas, 1960 to 1985, and Projections, 1990 and 2000

[In millions. The 100 largest cities are large urban agglomerations, composed, in most cases, of the central city, adjacent smaller cities and towns, and suburbs. City boundaries depend on local administrative boundaries, population densities, types of economic activity and other characteristics. Rankings depend on the population living within the urban agglomeration boundaries as determined by local and national governments. Rankings would not necessarily be the same if uniform criteria were used. The estimates for the Chinese cities should be considered tentative]

CITIES RANKED BY POPULATION SIZE, 1985	1960	1970	1975	1980	1985	1990, proj.	2000, proj.

NO. 1412. ORGANIZATION FOR ECONOMIC COOPERATION AND DEVELOPMENT (OECD)—GROSS NATIONAL PRODUCT, 1980 TO 1987, AND CHANGE, 1980–1985 AND 1985–1987

[For interpretation of the absolute levels of GNP and per capita GNP, the market exchange rates used in converting national currencies do not necessarily reflect the relative purchasing power in the various countries. As a consequence, it should not be concluded, for instance, that the United Kingdom's individual standard of living in 1987 was only 64 percent of that of the U.S., as the statistics may imply. Minus sign (–) indicates decrease. For explanation of annual percent change, see Guide to Tabular Presentation]

COUNTRY	GROSS NATIONAL PRODUCT (GNP)					GNP PER CAPITA					Inflation rate,[2] 1986–1987 (percent)

NO. 1413. GROSS DOMESTIC PRODUCT, TOTAL AND PER CAPITA, USING PURCHASING POWER PARITIES—SELECTED COUNTRIES: 1970 TO 1986

[The goods and services produced in different countries should be valued consistently if the differences observed are meant to reflect real differences in the volumes of goods and services produced. The use of purchasing power parities (PPP) instead of exchange rates is intended to achieve this objective. PPP's show how many units of currency are needed in one country to buy the same amount of goods and services which one unit of currency will buy in the other country. For further explanation of PPP, see text, section 31]

- Represents zero. NA Not available. [1] Beginning 1980, data not comparable with 1970 and 1975 data and data for secondary treatment include 1 percent and 2 percent of non-discharge treatment. Primary treatment may provide some biological treatment. Secondary is preliminary treatment plus biological process with no additional treatment except disinfection. [2] 1976 data. [3] 1984 data. [4] 1979 data. [5] Secondary usually includes private treatment and includes waste stabilization ponds. Tertiary refers to secondary treatment with phosphorus removal. [6] 1983 data. [7] Estimated. [8] Data for secondary category may include data for primary treatment only. [9] Urban population only (85 percent of total). Primary: Removal of sediments; Secondary: Chemical or biological treatment; Tertiary: Chemical, biological and complementary treatment. [10] England and Wales only. Primary: Removal of gross solids; Secondary: Aerobic removal of organic material or bacteria; Tertiary: Removal of suspended solids following secondary treatment. [11] 1969 data.

- Represents or rounds to zero. NA Not available. [1] Includes West Berlin. [2] Compensation includes, but real hourly compensation excludes, adjustments for payroll and employment taxes that are not compensation to employees, but are labor costs to employers. [3] Index of hourly compensation divided by the index of consumer prices to adjust for changes in purchasing power. [4] Indexes in national currency adjusted for changes in prevailing exchange rates.

No. 1432. World Production of Major Mineral Commodities, by Selected Commodity: 1982 to 1986

[Metric ton = 1.023 short tons]

COMMODITY	Unit	1982	1983	1984	1985, prel.	1986, est.	Leading producers, 1986
MINERAL FUELS							
Coal	Mil. metric tons	3,913	4,010	4,204	4,421	4,508	China: Mainland, U.S., Soviet Union
Gas, natural, marketed	Tril. cu. ft	54.5	54.7	59.5	61.7	63.1	Soviet Union, U.S., Canada.
Natural gas liquids [1]	Mil. barrels [2]	1,393	1,439	1,626	1,608	1,645	U.S., Soviet Union, Saudi Arabia.
Petroleum, crude	Mil. barrels [2]	19,414	19,233	19,807	19,471	20,369	Soviet Union, U.S., Saudi Arabia.
Petroleum, refined	Mil. barrels [2]	20,830	20,449	22,172	21,361	22,106	U.S., Soviet Union, Japan.
NONMETALLIC MINERALS							
Cement, hydraulic	Mil. metric tons	888	917	941	958	998	China: Mainland, Soviet Union, U.S.
Diamond, gem and industrial [1]	1,000 carats	40,431	55,392	63,427	66,145	91,833	Australia, Zaire, Botswana.
Nitrogen in ammonia	Mil. metric tons	75.9	79.4	86.1	88.0	87.0	Soviet Union, China: Mainland, U.S.
Phosphate rock	Mil. metric tons	127	139	150	147	137	U.S., Soviet Union, Morocco.
Potash, marketable	Mil. metric tons	24.5	27.4	29.3	29.1	28.2	Soviet Union, Canada, East Germany
Salt	Mil. metric tons	164	159	173	174	174	U.S., China: Mainland, Soviet Union
Sulfur, elemental basis	Mil. metric tons	50.6	50.3	52.5	54.6	54.2	U.S., Soviet Union, Canada.
METALS							
Aluminum [3]	Mil. metric tons	13.4	13.9	15.7	15.4	15.3	U.S., Soviet Union, Canada.
Bauxite, gross weight	Mil. metric tons	80.9	80.2	89.4	85.9	87.5	Australia, Guinea, Jamaica.
Chromite, gross weight [1]	1,000 metric tons	8,480	8,222	9,758	10,551	10,336	South Africa, Soviet Union, Albania.
Copper, metal content [4]	1,000 metric tons	7,622	7,662	7,974	8,088	8,156	Chile, U.S., Canada.
Gold, metal content	Mil. troy ounces	43.1	45.0	46.5	48.7	50.9	South Africa, Soviet Union, U.S.
Iron ore, gross weight [5]	Mil. metric tons	781	740	835	851	862	Soviet Union, Brazil, Australia.
Lead, metal content [4]	1,000 metric tons	3,448	3,358	3,252	3,394	3,247	Soviet Union, Australia, U.S.
Manganese ore, gross weight	Mil. metric tons	24.2	21.9	23.7	24.4	24.2	Soviet Union, South Africa, Brazil.
Nickel, metal content [4]	1,000 metric tons	621	675	770	802	784	Soviet Union, Canada, Australia.
Steel, crude	Mil. metric tons	644	663	710	717	707	Soviet Union, Japan, U.S.
Tin, metal content [4]	1,000 metric tons	219	197	198	189	180	Malaysia, Brazil, Soviet Union.
Zinc, metal content [4]	1,000 metric tons	6,125	6,368	6,602	6,857	6,853	Canada, Soviet Union, Australia.

[1] Excludes China: Mainland. [2] 42-gallon barrels. [3] Unalloyed ingot metal. [4] Mine output. [5] Includes iron ore concentrates and iron ore agglomerates.

NA Not available. X Not applicable. Z Less than 50,000 metric tons. [1] Based on apparent consumption of coal, lignite, petroleum products, natural gas, and hydro, nuclear, and geothermal electricity. [2] Comprises production by utilities generating primarily for public use, and production by industrial establishments generating primarily for own use. Relates to production at generating centers, including station use and transmission losses. [3] Includes shale oil, but excludes natural gasoline. [4] Excludes lignite and brown coal, except as noted. [5] Net production, i.e. excluding station use. [6] United Nations Statistical Office estimate. [7] For year ending June 30 of year shown. [8] Includes slurries. [9] Source: U.S. Bureau of the Census. Data from Republic of China publications. [10] Includes Monaco. [11] For year ending March 20 of year shown. [12] Includes San Marino. [13] Includes share of production and consumption in the Neutral Zone. [14] Includes patent fuel and hard coal briquettes. [15] Includes Svalbard and Jan Mayen Islands. [16] Includes Botswana, Lesotho, Namibia, and Swaziland. [17] Includes Liechtenstein. [18] Includes inputs other than crude petroleum and natural gas liquids.

No. 1446. Total External Public Debt, 1980 to 1986, and by Type of Creditor, 1986, and Debt Service Payments and Ratio, 1980 to 1986

[External public debt is defined as debt repayable to external creditors in foreign currency, goods, or services, with an original or extended maturity of more than one year, which is a direct obligation of, or has repayment guaranteed by, a public body in the borrowing country. Excludes undisbursed debt (amounts not yet drawn by recipient) and unguaranteed private debt, which for some countries is substantial. Debt contracted for the purchase of military equipment is not usually reported. Debt service payments represent the sum of interest payments and repayments of principal on external public debt]

NO. 1447. NET FLOW OF FINANCIAL RESOURCES TO DEVELOPING COUNTRIES, BY ORIGIN AND TYPE OF RESOURCE: 1970 TO 1987

[In **billions of U.S. dollars.** Net flow covers loans, grants, and grant-like flows minus amortization on loans. Military flows ar excluded. Developing countries cover countries designated by Development Assistance Committee as developing. The DAC lis differs from the UN list (see table 1403) by the inclusion of Greece, Malta, Portugal, Spain (through 1981), and Yugoslavia, and the exclusion of South Africa. Official development assistance covers all flows to developing countries and multilateral institutions provided by official agencies, including State and local governments, or by their executive agencies, which are administered with the promotion of economic development and welfare of developing countries as their main objective and whose financial terms are intended to be concessional in character with grant element of at least 25 percent. Other official flows cover export credits and portfolio investment from the official sector]

- Represents zero. Z Less than 50 cents.

Source of tables 1447 and 1448: Organization for Economic Cooperation and Development, Paris, France, unpublished data.

No. 1449. Military Expenditures in Current and Constant (1984) Dollars: 1975 to 1985

[In millions of dollars, except as indicated. See also table 533. For most countries, data for expenditures and for GNP were based on local currencies which were deflated to constant 1984 local currency values before conversion to U.S. dollar equivalents. In general, the rates used for conversion are the 1984 average par/market exchange rates as supplied by the International Bank for Reconstruction and Development]

Appendix I

Guide to —
Sources of Statistics, State Statistical Abstracts, and Foreign Statistical Abstracts

Alphabetically arranged by subject, this guide contains references to the important primary sources of statistical information for the United States. Secondary sources have been included if the information contained in them is presented in a particularly convenient form or if primary sources are not readily available. Nonrecurrent publications presenting compilations or estimates for years later than 1978 or types of data not available in regular series are also included.

Much valuable information may also be found in State reports (see pp. 883-887) and foreign statistical abstracts (see pp. 888 and 889) and in reports for particular commodities, industries, or similar segments of our economic and social structures, many of which are not included here.

Publications listed under each subject are divided into two main groups: "U.S. Government" and "Other." The location of the publisher of each report is given except for Federal agencies located in Washington, DC. Most Federal publications may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, tel. (202) 783-3238, or from Government Printing Office bookstores in certain major cities. In some cases, Federal publications may be obtained from the issuing agency.

Major reports, such as the Census of Population, which consist of many volumes, are listed by their general, all-inclusive titles.

Bureau of the Census Publications

In most cases, separate reports of the most recent censuses are available for each State, subject, industry, etc. Complete information on publications of all the censuses and current surveys conducted by the Bureau of the Census appears in the *Bureau of the Census Catalog*, published annually and available from the Superintendent of Documents.

Guide to State Statistical Abstracts

This bibliography includes the most recent statistical abstracts for States and Puerto Rico published since 1978 plus those that will be issued in late 1988 or early 1989. For some States, a near equivalent has been listed in substitution for, or in addition to, a statistical abstract. All sources contain statistical tables on a variety of subjects for the State as a whole, its component parts, or both. The page counts given for publications are approximate.

Alabama

University of Alabama, Center for Business and Economic Research, P.O. Box 870221, Tuscaloosa 35487 (205)348-6191

Economic Abstract of Alabama. 1987. 475 pp.

Alaska

Department of Commerce and Economic Development, Office of Economic Analysis, Pouch D, Juneau 99811

The Alaska Economic and Statistical Review. 1984. 194 pp. (Out of print.)

Arizona

Valley National Bank, P.O. Box 71, Phoenix 85001 (602)261-5043

Arizona Statistical Review. 44th ed. 1988.

University of Arizona, Division of Economic and Business Research, College of Business and Public Administration, Tucson 85721 (602)621-2155

Arizona Statistical Abstract: A 1989 Data Handbook. 500 pp.

Arizona Economic Indicators. 52 pp. (Biannual.)

Arkansas

University of Arkansas at Little Rock, Regional Economic Analysis, Library 512, Little Rock 72204

Arkansas State and County Economic Data. 18 pp. (Revised annually.)

University of Arkansas at Little Rock, State Data Center, Library 508, Little Rock 72204

Arkansas Statistical Abstract. 500 pp. (Revised biennially.)

California

Department of Finance, 915 L Street, 8th Floor, Sacramento 95814 (916)322-2263

California Statistical Abstract, 1988. 280 pp.

Publishers Group West, 4065 Hollis Street, Emeryville 94608 (415)658-3453

California Almanac, 3d ed. Biennial. 650 pp.

Colorado

University of Colorado, Business Research Division, Campus Box 420, Boulder 80309 (303)492-8227

Statistical Abstract of Colorado, 1987. 600 pp.

Connecticut

Connecticut Department of Economic Development, 210 Washington St., Hartford 06106

Connecticut Market Data. 1988-89.

Delaware

Delaware Development Office, P.O. Box 1401, Dover 19903 (302)736-4271

Delaware Data Book, 1988. 146 pp.

District of Columbia

Office of Planning, Data Services Division, Presidential Bldg., Suite 500, 415 12th St., N.W. 20004

Population Estimates and Housing Units, annual.

Office of Policy, Room 208, 1350 Pennsylvania Ave., N.W. 20004 - Inquiries (202)727-4016; Copies--Office of Documents and Administrative Issues, Room 406 (202)727-5090

Indices—A Statistical Index to DC Services, 1988. Annual. 304 pp.

Florida

University of Florida, Bureau of Economic and Business Research, Gainesville 32611 (904)392-0171

Florida Statistical Abstract, 1988. 22d ed. 1988. 730 pp.

National Data Consultants, P.O. Box 6381, Athens, Georgia 30604 (404)548-8460

Florida County Perspectives: 1989. Annual. 109 pp.

Georgia

University of Georgia, Division of Research, College of Business Administration, Athens 30602 (404)542-4085

Georgia Statistical Abstract, 1988-89. 1988. 512 pp.

University of Georgia, College of Agriculture, Cooperative Extension Service, Athens 30602 (404)542-8940

The Georgia County Guide. 1989. 8th ed. Annual. 171 pp.

Office of Planning and Budget, 270 Washington St., S.W., Atlanta 30334 (404)656-0911

Georgia Descriptions in Data. 1988. 175 pp.

Hawaii

Hawaii State Department of Business and Economic Development, P.O. Box 2359, Honolulu 96804 - Inquiries (808)548-3072; Copies (808)548-3067

The State of Hawaii Data Book 1988: A Statistical Abstract. 22d ed. 1988. 700 pp.

University of Hawaii Press, Honolulu 96822

Historical Statistics of Hawaii. 1977. 711 pp.

Idaho

Department of Commerce, 700 West State St., Boise 83720 (208)334-2470

County Economic Profiles, 1982. (Separate report for each county.)

County Profiles of Idaho, 1988.

Idaho Community Profiles, 1988.

Idaho Facts, 1988.

University of Idaho, Center for Business Development and Research, Moscow 83843

Idaho Statistical Abstract. 1980. 415 pp. (Out of print.)

Illinois

University of Illinois, Bureau of Economic and Business Research, 428 Commerce West, 1206 South 6th Street, Champaign 61820 (217)333-2330

Illinois Statistical Abstract. 1987. 650 pp.

Department of Commerce and Community Affairs, 620 Adams St., Springfield 62701 (217)782-1438

Illinois State and Regional Economic Data Book—1985. 351 pp.

Indiana

Indiana University, Indiana Business Research Center, School of Business, Bloomington 46223 (317)274-2204

Indiana Factbook, 1985. 420 pp.

Indiana Factbook Update, 1989.

Iowa

Iowa Department of Economic Development, Research Bureau, 200 East Grand Ave., Des Moines 50309

1987 Statistical Profile of Iowa. 116 pp.

Kansas

University of Kansas, Institute for Public Policy and Business Research, 607 Blake Hall, Lawrence 66045-2960

Kansas Statistical Abstract, 1987-88. 23d ed. 1988.

Kentucky

Department of Business Development, Capital Plaza Office Tower, Frankfort 40601

Kentucky Economic Statistics. 25th ed. 1989.

Louisiana

University of New Orleans, Division of Business and Economic Research, New Orleans 70148, and Louisiana State Planning Office, Baton Rouge 70804 (504)286-6248

Statistical Abstract of Louisiana. 7th ed. 1981. 413 pp.

Maine

Maine Department of Economic and Community Development, State House Station 59, Augusta 04333 (207)289-2656

Maine: A Statistical Summary. (Updated periodically.)

Maryland

Department of Economic and Employment Development, 217 E. Redwood St., Baltimore 21202 - Inquiries (301)333-6953; Copies (301)333-6600

Maryland Statistical Abstract. 1988-89. 272 pp. (Biennial.)

Massachusetts

Massachusetts Institute for Social and Economic Research, 128 Thompson Hall, University of Massachusetts at Amherst 01003 (413)545-3460

Population Projections 1990 and 1995, Cities and Towns in Massachusetts. March 1988. 400 pp.

Michigan

Wayne State University, Bureau of Business Research, School of Business Administration, Detroit 48202

Michigan Statistical Abstract. 20th ed. 1986-87. 629 pp.

Minnesota

Department of Trade and Economic Development, Policy Analysis Office, 900 American Center Building, St. Paul 55101 (612)296-8341

Compare Minnesota: An Economic and Statistical Factbook, 1988-89. 137 pp.

Economic Report to the Governor: State of Minnesota, 1989. 164 pp.

Office of State Demographer, State Planning Agency, 300 Centennial Bldg., St. Paul 55155 (612)296-2557

Minnesota Population and Household Estimates, 1987. 74 pp.

Mississippi

Mississippi State University, College of Business and Industry, Division of Research, Mississippi State 39762 (601)325-3817

Mississippi Statistical Abstract. 1988. 650 pp.

Missouri

University of Missouri, Business and Public Administration Research Center, Columbia 65211 (314)882-4805

Statistical Abstract for Missouri, 1987. Biennial. 350 pp.

Appendix II

Metropolitan Area Concepts and Components and Population of Metropolitan Statistical Areas

Statistics for metropolitan areas shown in the *Statistical Abstract* represent areas designated by the U.S. Office of Management and Budget (OMB) as standard metropolitan statistical areas (SMSA's) or metropolitan statistical areas (MSA's). Effective June 30, 1983, OMB changed the basic term from SMSA to MSA and revised the geographic definitions of many individual metropolitan areas; some new areas were defined, and some areas were redesignated as PMSA's or CMSA's (see further explanation below). The revised definitions appear in OMB press release 83-20 of June 27, 1983. The official standards for defining MSA's appeared in the Federal Register, January 3, 1980 (part 6). Revisions of MSA definitions are made periodically by OMB, mainly to add newly qualified MSA's or central cities.

The list of areas which follows (see p. 893) specifies components and population totals and refers to the definitions in effect on June 30, 1988. On that date, there were 266 MSA's, as well as 21 CMSA's comprising 73 PMSA's (including 4 MSA's, 1 CMSA, and 2 PMSA's in Puerto Rico). The figures in tables A, B, and C below (see pp. 891 and 892), exclude the areas in Puerto Rico.

The general concept of a metropolitan area is one of a large population nucleus, together with adjacent communities which have a high degree of economic and social integration with that nucleus. Standard definitions of metropolitan statistical areas were first issued in 1949 by the then Bureau of the Budget (predecessor of OMB), under the designation, "Standard Metropolitan Areas"; the term was changed to SMSA in 1959. From 1977 to 1981, the SMSA's were the responsibility of the Office of Federal Statistical Policy and Standards, Department of Commerce.

The criteria for the establishment and definition of SMSA's were modified in 1958, 1971, and 1975. The current standards were adopted in January 1980; they provide that each MSA must include at least:

(a) One city with 50,000 or more inhabitants, or

(b) A Census Bureau-defined urbanized area of at least 50,000 inhabitants *and* a total MSA population of at least 100,000 (75,000 in New England).

The standards provide that the MSA include as "central county(ies)" the county in which the central city is located, and adjacent counties, if any, with at least 50 percent of their population in the urbanized area. Additional "outlying counties" are included if they meet specified requirements of commuting to the central counties and of metropolitan character (such as population density and percent urban). In New England the MSA's are defined in terms of cities and towns rather than counties.

The 1980 standards provide that within metropolitan complexes of 1 million or more population, separate component areas are defined if specified criteria are met. Such areas are designated primary metropolitan statistical areas (PMSA's); and any area containing PMSA's is designated a consolidated metropolitan statistical area (CMSA). Besides the 21 CMSA's, there are 17 MSA's of 1 million or more in 1987 within which no component PMSA's are established. Of the 73 PMSA's, most were formerly SMSA's, but some were newly established in 1983.

Of the 21 CMSA's most were previously recognized as standard consolidated statistical areas (SCSA's), but 5 were formerly SMSA's within which PMSA's were newly qualified in 1983.

The standards adopted in 1980 were implemented in two stages. First, they were used to define a group of 36 new areas in June 1981. The 323 SMSA's as of June 30, 1981 were reported in the 1980 census tabulations and publications. Next, the boundaries of all SMSA's were reviewed in 1982–83 under the new standards after 1980 commuting data became available.

Revised 1980 standards for determining central cities and titles were implemented as part of the 1982–83 review. The largest city in each MSA is designated a "central city"; in addition there may be additional central cities if specified requirements are met. The title of each MSA consists of the name(s) of up to three of its central cities and the name of each State into which the MSA extends. However, a central city generally is not included in an MSA title unless it has at least one-third the population of the area's largest city. Prior to 1983, virtually all central cities appeared in area titles. An MSA may include other cities of 50,000 or more besides its central or title cities.

One report relating to the new MSA definitions has been published as *1980 Census of Population, Supplementary Report, Metropolitan Statistical Areas* (PC80-S1-18). The *State and Metropolitan Area Data Book, 1986* presents 298 data items for metropolitan areas from a wide variety of sources (see inside back cover).

New England MSA's and NECMA's.—Because MSA's in New England are defined in terms of cities and towns rather than counties, some statistical data that are available only for counties cannot be compiled for individual New England MSA's. Therefore, for New England areas, data are shown for both New England County Metropolitan Areas (NECMA's) and MSA's wherever possible. The NECMA's provide a county version of the New England areas, but do not replace New England MSA's as the standard areas. NECMA's are defined corresponding to the 3 CMSA's in New England and for the portion of the New York–Northern New Jersey–Long Island CMSA in Connecticut. There are no NECMA definitions corresponding to New England PMSA's.

Effect of changes in MSA definitions.—Changes in the definitions of MSA's since 1949 have consisted chiefly of (1) the recognition of new areas as, for example, cities reached 50,000 population; and (2) the addition of counties (or towns in New England) to existing MSA's as new census data showed them to qualify. Also, several formerly separate MSA's have been merged, and occasionally territory has been transferred from one MSA to another or from an MSA to nonmetropolitan territory. Comparisons of MSA figures over time may be affected in cases where the MSA definitions were changed. To maintain comparability, data for an earlier period have been revised in this volume where possible, to reflect the MSA boundaries of the more recent period. However, this could not always be done; for data based on a sample survey, in particular, it is usually not possible to revise the data to reflect changes in MSA definitions that occurred after the survey was made.

In tables A, B, and C that follow, data are given for MSA's as defined for specified dates, thereby indicating the extent of change in population and land area resulting from revisions in definitions.

TABLE A. NUMBER, POPULATION, AND LAND AREA OF MSA'S AS DEFINED AT SPECIFIED DATES FROM 1950 TO 1988

[The differences in population shown here for each year within each column of the table result entirely from net expansion of metropolitan territory through changes in the MSA definitions. The differences in population shown for each MSA definition (on the successive lines of the table) result entirely from population changes within that territory, unaffected by changes in MSA definitions. The changes in 1980 land area result entirely from net expansion of MSA territory. All data include Alaska and Hawaii and exclude Puerto Rico. Subtraction of any line of the table from the line below will show the net effect of change in population and land area undergone by the MSA's as the result of changes in definitions between the specified dates. Such changes typically occurred throughout the period, not on any single date, and may have included reductions in, as well as additions to, MSA territory. Census population data for 1970 include corrections made since publication. The area data for the 1950, 1960, and 1970 census definitions of MSA's differ from the data published in those censuses because of subsequent remeasurement of land areas and changes in inland water area occurring up to 1980]

MSA DEFINITION AS OF—	Number of MSA's	POPULATION					Land area, **1980** (sq. mi.)
		1950, Apr. 1	**1960**, Apr. 1	**1970**, Apr. 1	**1980**, Apr. 1	**1987**, July 1

1986 (June 30)	[12] 281	105,481,211	132,977,580	155,805,452	172,304,016	186,909,955	572,871
1987 (June 30) [13]	[12] 281	105,502,909	133,003,445	155,832,686	172,334,547	186,940,747	573,412
1988 (June 30)	[12] 282	105,582,961	133,088,400	155,937,275	172,454,948	187,071,981	574,679

[1] Corresponds to total MSA population for 1950 published in 1950 census (84,500,680) plus Honolulu MSA. [2] Corresponds to total MSA population for 1960 published in 1960 census (112,885,178), corrected by subtracting population (39) erroneously included in Franklin County, Ohio (Columbus MSA). [3] MSA's as defined for the 1963 economic censuses. [4] MSA's as defined for the 1967 economic censuses. [5] Corresponds to total 1960 population for 1970 MSA's published in 1970 census (119,594,754), corrected by subtracting 1,256 population from Lawrence-Haverhill MSA; this represented an addition to the 1960 population of Andover town made subsequent to the original census tabulations, and therefore not reflected in State or national totals. [6] Corresponds to total MSA population for 1970 published in 1970 census (139,418,811), plus net corrections made subsequent to publication. [7] MSA's as defined for the 1972 economic censuses. [8] Includes estimated 1950 population (32,060) of Anchorage Census Division, as defined in 1970. [9] Includes 1960 population (82,833) of Anchorage Census Division, as defined in 1970. [10] MSA's as defined for the 1977 economic censuses. [11] MSA's as defined for the 1982 economic censuses. [12] MSA's and CMSA's. [13] MSA's as defined for the 1987 economic censuses.

Appendix **III**

Statistical Methodology and Reliability

Introduction.—The data presented in this *Statistical Abstract* came from many sources. The sources include not only Federal statistical bureaus and other organizations that collect and issue statistics as their principal activity, but also governmental administrative and regulatory agencies, private research bodies, trade associations, insurance companies, health associations, and private organizations such as the American Red Cross and philanthropic foundations. Consequently, the data vary considerably as to reference periods, definitions of terms and, for ongoing series, the number and frequency of time periods for which data are available.

The statistics presented were obtained and tabulated by various means. Some statistics are based on complete enumerations or censuses while others are based on samples. Some information is extracted from records kept for administrative or regulatory purposes (school enrollment, hospital records, securities registration, financial accounts, social security records, income tax returns, etc.), while other information is obtained explicitly for statistical purposes through interviews or by mail. The estimation procedures used vary from highly sophisticated scientific techniques, to crude "informed guesses."

Each set of data relates to a group of individuals or units of interest referred to as the *target universe* or *target population*, or simply as the *universe* or *population*. Prior to data collection the target universe should be clearly defined. For example, if data are to be collected for the universe of households in the United States, it is necessary to define a "household." The target universe may not be completely tractable. Cost and other considerations may restrict data collection to a *survey universe* of households on some available list, such list being inaccurate, out of date, defining "household" slightly differently, etc. This list is called a *survey frame* or *sampling frame*.

The data in many tables are based on data obtained for all population units, *a census*, or on data obtained for only a portion, or *sample*, of the population units. When the data presented are based on a sample, the sample is usually a scientifically selected *probability sample*. This is a sample selected from a list or sampling frame in such a way that every possible sample has a known chance of selection and usually each unit selected can be assigned a number, between zero and one, representing its likelihood or probability of selection.

For large-scale sample surveys, the probability sample of units is often selected as a multistage sample. The first stage of a multistage sample is the selection of a probability sample of large groups of population members, referred to as primary sampling units (PSU's). For example, in a national multistage household sample, PSU's are often counties or groups of counties. The second stage of a multistage sample is the selection, within each PSU selected at the first stage, of smaller groups of population units, referred to as secondary sampling units. In subsequent stages of selection, smaller and smaller nested groups are chosen until the ultimate sample of population units is obtained. To qualify a multistage sample as a probability sample, all stages of sampling must be carried out using probability sampling methods.

Prior to selection at each stage of a multistage (or a single- stage) sample, a list of the sampling units or sampling frame for that stage must be obtained. For example, for the first stage of selection of a national household sample, a list of the counties and county groups that form the PSU's must be obtained. For the final stage of selection, lists of households, and sometimes persons within the households, have to be compiled in the field. If a single-stage sample of the Nation's hospitals is to be selected, a list of hospitals must be obtained to use as the sampling frame. Unfortunately, it is virtually impossible to obtain a complete, up-to-date frame for a hospital survey. This is a problem incurred for most surveys of institutions and for many other types of surveys as well.

Wherever the quantities in a table refer to an entire universe, but are constructed from data collected in a sample survey, the table quantities are referred to as *sample estimates*. In constructing a sample estimate, an attempt is made to come as close as is feasible to the corresponding universe quantity that would be obtained from a complete census of the universe. Estimates based on a sample will, however, generally differ from the hypothetical census figures. Two classifications of errors are associated with estimates based on sample surveys: (1) *sampling error*—the error arising from the use of a sample, rather than a census, to estimate population quantities and (2) *nonsampling error*—those errors arising from nonsampling sources. As discussed below, the magnitude of the sampling error for an estimate can usually be estimated from the sample data. However, the magnitude of the nonsampling error for an estimate can rarely be estimated. Consequently, actual error in an estimate exceeds the estimated error in the estimate.

The particular sample used in a survey is only one of a large number of possible samples of the same size which could have been selected using the same sampling procedure. Estimates derived from the different samples would, in general, differ from each other. The *standard error* (SE) is a measure of the variation among the estimates derived from all possible samples. The standard error is the most commonly used measure of the sampling error of an estimate. Valid estimates of the standard errors of survey estimates can usually be calculated from the data collected in a probability sample. For convenience, the standard error is sometimes expressed as a percent of the estimate and is called the relative standard error or *coefficient of variation* (CV). For example, an estimate of 200 units with an estimated standard error of 10 units has an estimated CV of 5 percent.

A sample estimate and an estimate of its standard error or CV can be used to construct interval estimates that have a prescribed confidence that the interval includes the average of the estimates derived from all possible samples with a known probability. To illustrate, if all possible samples were selected under essentially the same general conditions, and using the same sample design, and if an estimate and its estimated standard error were calculated from each sample, then:

1. Approximately 68% of the intervals from one standard error below the estimate to one standard error above the estimate would include the average estimate derived from all possible samples.
2. Approximately 90% of the intervals from 1.6 standard errors below the estimate to 1.6 standard errors above the estimate would include the average estimate derived from all possible samples.
3. Approximately 95% of the intervals from two standard errors below the estimate to two standard errors above the estimate would include the average estimate derived from all possible samples.

Thus, for a particular sample, one can say with the appropriate level of confidence (e.g., 90% or 95%) that the average of all possible samples is included in the constructed interval. Example of a confidence interval: An estimate is 200 units with a standard error of 10 units. An approximately 90 % confidence interval (plus or minus 1.6 standard errors) is from 184 to 216.

All surveys and censuses are subject to nonsampling errors. Nonsampling errors are two kinds—*random* and *nonrandom*. Random nonsampling errors arise because of the varying interpretation of questions (by respondents or interviewers) and varying actions of coders, keyers, and other processors. Some randomness is also introduced when respondents must estimate values. These same errors usually have a nonrandom component. Nonrandom nonsampling errors result from total nonresponse (no usable data obtained for a sampled unit), partial or item nonresponse (only a portion of a response may be usable), inability or unwillingness on the part of respondents to provide correct information, difficulty interpreting questions, mistakes in recording or keying data, errors of collection or processing, and coverage problems (overcoverage and undercoverage of the target universe). Random nonresponse errors usually, but not always, result in an understatement of sampling errors and thus an overstatement of the precision of survey estimates. Estimating the magnitude of nonsampling errors would require special experiments or access to independent data and, consequently, the magnitudes are seldom available.

Nearly all types of nonsampling errors that affect surveys also occur in complete censuses. Since surveys can be conducted on a smaller scale than censuses, nonsampling errors can presumably be controlled more tightly. Relatively more funds and effort can perhaps be expended toward eliciting responses, detecting and correcting response error, and reducing processing errors. As a result, survey results can sometimes be more accurate than census results.

To compensate for suspected nonrandom errors, adjustments of the sample estimates are often made. For example, adjustments are frequently made for nonresponse, both total and partial. Adjustments made for either type of nonresponse are often referred to as *imputations*. Imputation for total nonresponse is usually made by substituting for the questionnaire responses of the nonrespondents the "average" questionnaire responses of the respondents. These imputations are usually made separately within various groups of sample members, formed by attempting to place respondents and nonrespondents together that have "similar" survey characteristics. Imputation for item nonresponse is usually made by substituting for a missing item the response to that item of a respondent having characteristics that are "similar" to those of the nonrespondent.

For an estimate calculated from a sample survey, the *total error* in the estimate is composed of the sampling error, which can usually be estimated from the sample, and the nonsampling error, which usually cannot be estimated from the sample. The total error present in a population quantity obtained from a complete census is composed of only nonsampling errors. Ideally, estimates of the total error associated with data given in the *Statistical Abstract* tables should be given. However, due to the unavailability of estimates of nonsampling errors, only estimates of the levels of sampling errors, in terms of estimated standard errors or coefficients of variation, are available. To obtain estimates of the estimated standard errors from the sample of interest, obtain a copy of the referenced report which appears at the end of each table.

Principal data bases.—Beginning below are brief descriptions of 34 of the sample surveys and censuses that provide a substantial portion of the data contained in this *Abstract*.

SECTION 1. POPULATION

Source and Title: Bureau of the Census, *Census of Population*

Tables: See tables citing *Census of Population* in section 1 and also in sections 2, 4, 6, 8, 13, 14, 26, and 30.

Universe, Frequency, and Types of Data: Complete count of U.S. population conducted every 10 years since 1790. Data obtained on number and characteristics of inhabitants.

Type of Data Collection Operation: In 1970 and 1980, complete census for some items—age, sex, race, marital status and relationship to household head. In 1970, other items collected from a 5% and a 15% probability (systematic) sample of the population. In 1980, approximately 19% of the housing units were included in the sample.

Data Collection and Imputation Procedures: In 1970, extensive use of mail questionnaires in urban areas; personal interviews in most rural areas. In 1980, mail questionnaires were used in even more areas than in 1970, with personal interviews in the remainder. Extensive telephone and personal followup for nonrespondents was done in both censuses. Imputations were made for missing characteristics.

Estimates of Sampling Error: Sampling errors for data are estimated for all items collected by sample and vary by characteristic and geographic area. The CV's for national and State estimates are generally very small.

Other (nonsampling) Errors: Since 1950, evaluation programs have been conducted to provide information on the magnitude of some sources of nonsampling errors such as response bias and undercoverage in each census. Results from the evaluation program for the 1980 census indicate that coverage improved substantially over previous censuses; demographic analysis estimated the net undercount at between 1.0 and 2.2 percent in 1980.

Sources of Additional Material: U.S. Bureau of the Census, *The Coverage of Population in the 1980 Census*, PHC80-E4; *Content Reinterview Study: Accuracy of Data for Selected Population and Housing Characteristics as Measured by Reinterview*, PHC80-E2; *1980 Census of Population*, vol. 1, (PC80-1), Appendixes B, C, and D.

Source and Title: U.S. Bureau of the Census, *Current Population Survey (CPS)*

Tables: See tables citing *Current Population Reports* primarily in section 1, but also in sections 2, 3, 4, 8, 12, 13, 14, 23, and 30. Many Bureau of Labor Statistics' (BLS) tables in section 13 are CPS based.

Universe, Frequency, and Types of Data: Nationwide monthly sample survey of civilian noninstitutional population, 14 years old or over, to obtain data on employment, unemployment, and a number of other characteristics.

Type of Data Collection Operation: Multistage probability sample of about 55,800 households in 729 PSU's in 1988. Over-sampling in some States and the largest MSA's to improve reliability for those areas of employment data on annual average basis. A continual sample rotation system is used. Households are in sample 4 months, out for 8 months, and in for 4 more. Month-to-month overlap is 75%; year-to-year overlap is 50%.

Data Collection and Imputation Procedures: For first and fifth months that a household is in sample, personal interviews; other months, approximately, 85% of the data collected by phone. Imputation is done for both item and total nonresponse. Adjustment for total nonresponse is done by a predefined cluster of units, by MSA size and residence; for item nonresponse imputation varies by subject matter.

Estimates of Sampling Error: Estimated CV's on national annual averages for labor force, total employment, and nonagricultural employment, 2%; for total unemployment and agricultural employment, 1.0% to 2.5%. The estimated CV's for family income and poverty rate for all persons in 1986 are .5% and 1.5%, respectively. CV's for subnational areas, such as States, would be larger and would vary by area.

Other (nonsampling) Errors: Estimates of response bias on unemployment are not available, but estimates of unemployment are usually 5% to 9% lower than estimates from reinterviews. Four to 5.0% of sample households unavailable for interviews.

Sources of Additional Material: U.S. Bureau of the Census and Bureau of Labor Statistics, *Concepts and Methods Used in Labor Force Statistics from Current Population Survey* (Census series P-23, No. 62; BLS Report No. 463) and Bureau of the Census, *Current Population Survey* (Tech. Paper 40) and Bureau of Labor Statistics, *BLS Handbook of Methods*, Chapter 1 (Bulletin 2285.)

(See section 3 below for information pertaining to the Supplement on Aging to the National Health Interview Survey.)

SECTION 2. VITAL STATISTICS

Source and Title: U.S. National Center for Health Statistics (NCHS), *Vital Registration System*

Tables: See tables citing *Vital Statistics of the United States*, 282 in section 5; 1019 in section 21; and 1385 in section 30.

Universe, Frequency, and Types of Data: Annual data on births and deaths in the United States.

Type of Data Collection Operation: Mortality data based on complete file of death records, except 1972, based on 50% sample. Natality statistics 1951-1971, based on 50% sample of birth certificates, except a 20% to 50% in 1967, received by NCHS. Beginning 1972, data from some States received through Vital Statistics Cooperative Program and complete file used; data from other States based on 50% sample.

Data Collection and Imputation Procedures: Reports based on records from registration offices of all States, District of Columbia, New York City, Puerto Rico, Virgin Islands, and Guam.

Estimates of Sampling Error: For recent years, CV's for births are small due to large portion of total file in sample (except for very small estimated totals).

Other (nonsampling) Errors: Data on births and deaths believed to be at least 99% complete.

Sources of Additional Material: U.S. National Center for Health Statistics, *Vital Statistics of the United States*, vol. I and vol. II, annual, and *Monthly Vital Statistics Report.*

SECTION 3. HEALTH AND NUTRITION

Source and Title: U.S. National Center for Health Statistics, *National Health Interview Survey (NHIS)*

Tables: 153, 175, 176, 182-187, 189, 190, 192, and in section 1, tables 42 and 43, section 4, table 217, and section 12, table 608.

Universe, Frequency, and Types of Data: Continuous data collection covering the civilian noninstitutional population to obtain information on personal and demographic characteristics, illnesses, injuries, impairments, and other health topics. In 1984, the Supplement on Aging (SOA) was added to the NHIS to collect data on the functional status of persons 55 years old and over living in the community. It included questions on characteristics which might affect their ability to live in the community.

Type of Data Collection Operation: Multistage probability sample of 42,000 households (in 376 PSU's) selected in groups of about four adjacent households.

Data Collection and Imputation Procedures: Personal household interviews with extensive followup of nonrespondents. Data are adjusted for nonresponse by imputation procedure based on "average" characteristics of persons in interviewed households in the same geographic area.

Estimates of Sampling Error: Estimated CV's: For physician visits by males, 1.5%; for workdays lost by males, 3.5%; for persons injured at home, 4.7%.

Other (nonsampling) Errors: Response rate was 95.7% in 1985 for the NHIS. For the SOA, response rate was 95% (89% responded entirely for themselves).

Sources of Additional Material: U.S. National Center for Health Statistics, "Current Estimates from the National Health Interview Survey, U.S., 1983," Vital and Health Statistics, series 10 and the "Supplement on Aging to the 1984 National Health Interview Survey," Vital and Health Statistics, series 1, No. 21, July 1987.

(See section 1 above for information pertaining to tables 93-96, and section 15 pertaining to table 144.)

SECTION 4. EDUCATION

Source and Title: U.S. Department of Education, National Center for Education Statistics, *Higher Education General Information Survey (HEGIS), Fall Enrollment in Institutions of Higher Education;* beginning 1986, *Integrated Postsecondary Data Survey (IPEDS), Fall Enrollment*

Tables: 210, 247-250; and 269.

Universe, Frequency, and Types of Data: Annual survey of all institutions and branches listed in the *Directory* to obtain data on total enrollment by sex, level of enrollment, type of program, racial/ethnic characteristics (in alternate years) and attendance status of student, and on first-time students.

Type of Data Collection Operation: Complete census.

Data Collection and Imputation Procedures: Survey package is usually mailed in the spring wi surveys due at varying dates in the summer and fall; mail and phone followup procedures fo nonrespondents. Missing data are imputed by using data for an earlier year, adjusted for trend observed in earlier surveys, or data of similar institutions.
Estimates of Sampling Error: Not applicable.
Other (nonsampling) Errors: Approximately 93% response rate.
Sources of Additional Material: U.S. Department of Education, National Center for Education Statistics, *Fall Enrollment in Higher Education*, annual.

Source and Title: U.S. Department of Education, National Center for Education Statistics, *Highe Education General Information Survey (HEGIS), Financial Statistics of Institutions of Higher Education*
Tables: 200, 201, 247, and 257.
Universe, Frequency, and Types of Data: Annual survey of all institutions and branches listed in the *Education Directory, Colleges and Universities* to obtain data on financial status and operations, including current funds revenues, current funds expenditures, and physical plant assets.
Type of Data Collection Operation: Complete census.
Data Collection and Imputation Procedures: Survey package is usually mailed in the spring with surveys due at varying dates in the summer and fall; mail and phone followup procedures for nonrespondents. Missing data are imputed by using data for an earlier year, adjusted for trends observed in earlier HEGIS surveys, or data of similar institutions.
Estimates of Sampling Error: Not applicable.
Other (nonsampling) Errors: For 1986, a 87% response rate. Imputed expenditures amounted to about 2.8% of total expenditures.
Sources of Additional Material: U.S. Department of Education, National Center for Education Statistics, *Financial Statistics of Institutions of Higher Education*, annual.

Source and Title: U.S. Department of Education, National Center for Education Statistics, *Higher Education General Information Survey (HEGIS), Degrees and Other Formal Awards Conferred*
Tables: 266-269.
Universe, Frequency, and Types of Data: Annual survey of all institutions and branches listed in the *Education Directory, Colleges and Universities* to obtain data on earned degrees and other formal awards, conferred by field of study, level of degree, sex, and by racial/ethnic characteristics (in alternate years).
Type of Data Collection Operation: Complete census.
Data Collection and Imputation Procedures: Survey package is usually mailed in the spring with surveys due at varying dates in the summer and fall; mail and phone followup procedures for nonrespondents. Missing data are imputed by using data for an earlier year, adjusted for trends observed in earlier HEGIS surveys, or data of similar institutions.
Estimates of Sampling Error: Not applicable.
Other (nonsampling) Errors: For 1985-86, approximately 93% response rate.
Sources of Additional Material: U.S. Department of Education, National Center for Education Statistics, *Earned Degrees Conferred*, annual.

(See sections 1 and 9 for information pertaining to the Bureau of the Census and section 3 above for the National Center for Health Statistics.)

SECTION 5. LAW ENFORCEMENT, COURTS, AND PRISONS

Source and Title: U.S. Federal Bureau of Investigation, *Uniform Crime Reporting (UCR) Program*
Tables: 277-281, 283, 284, and 292-295.
Universe, Frequency, and Types of Data: Monthly reports on the number of criminal offenses that become known to law enforcement agencies. Data are collected on crimes cleared by arrest, by age, sex, and race of offender, and on assaults on law enforcement officers.
Type of Data Collection Operation: Crime statistics are based on reports of crime data submitted either directly to the FBI by contributing law enforcement agencies or through cooperating State UCR programs.
Data Collection and Imputation Procedures: States with UCR programs collect data directly from individual law enforcement agencies and forward reports, prepared in accordance with UCR standards, to FBI. Accuracy and consistency edits are performed by FBI.
Estimates of Sampling Error: Not applicable.
Other (nonsampling) Errors: Coverage of 96% of the population (98% in SMSA's, 93% in "other cities," and 89% in rural areas) by UCR program, though varying number of agencies report. Some error is present through incorrect reporting.
Sources of Additional Material: U.S. Federal Bureau of Investigation, *Crime in the United States*.

Source and Title: U.S. Bureau of Justice Statistics (BJS), *National Crime Survey*

Tables: 265-269.

Universe, Frequency, and Types of Data: Monthly survey of individuals and households in the U.S. to obtain data on criminal victimization of those units for compilation of annual estimates.

Type of Data Collection Operation: National probability sample survey of about 59,000 interviewed households in 376 PSU's selected from a list of addresses from the 1970 census, supplemented by new construction permits and an area sample where permits are not required.

Data Collection and Imputation Procedures: Interviews are conducted every 6 months for 3 years for each household in the sample; 10,000 households are interviewed monthly. Personal interviews are used in the first, third, fifth, and seventh interviews; the intervening interviews are conducted by telephone whenever possible.

Estimates of Sampling Error: CV's in 1985: 2.2% for crimes of violence; 14.8% for estimate of rape counts; 5.5% for robbery counts; 2.5% for assault counts; 1.4% for personal larceny counts; 2.2% for burglary counts; 1.8% for household larceny; 1.3% for all household crimes; and 4.8% for motor vehicle theft counts.

Other (nonsampling) Errors: Respondent recall errors which may include reporting incidents for other than the reference period; interviewer coding and processing errors; and possible mistaken reporting or classifying of events. Adjustment is made for a household noninterview rate of about 4% and for a smaller within-household noninterview rate.

Sources of Additional Material: U.S. Bureau of Justice Statistics, *Criminal Victimization in the United States*, annual.

(See section 2 for details on table 282 and section 9 for details on table 302.)

SECTION 8. ELECTIONS

(See section 1 above for information pertaining to table 432.)

SECTION 9. STATE AND LOCAL GOVERNMENT FINANCES AND EMPLOYMENT

Source and Title: U.S. Bureau of the Census, *Census of Governments*

Tables: See tables in section 9 citing *Census of Governments*.

Universe, Frequency, and Types of Data: Survey of all governmental units in the U.S. conducted every 5 years to obtain data on government revenue, expenditures, debt, employment and employee retirement systems, property values, public school systems, and number, size, and structure of governments.

Type of Data Collection Operation: Complete census. List of units derived through classification of government units recently authorized in each State and identification, counting, and classification of existing local governments and public school systems.

Data Collection and Imputation Procedures: Data collected through field and office compilation of financial data from official records and reports for States and large local governments; mail canvass of selected data items, like State tax revenue and employee retirement systems; and collection of local government statistics through central collection arrangements with State governments.

Estimates of Sampling Error: Not applicable.

Other (nonsampling) Errors: Some nonsampling errors may arise due to possible inaccuracies in classification, response, and processing.

Sources of Additional Material: U.S. Bureau of the Census, *Census of Governments, 1982*, various reports, and *State Government Finances in 1986*, GF 86, No. 3.

Source and Title: U.S. Bureau of the Census, *Annual Surveys of State and Local Government*

Tables: See tables citing *Public Employment* and *Governmental Finances* in section 9; table 228 in section 4; table 302 in section 5; and table 586 in section 12.

Universe, Frequency, and Types of Data: Sample survey conducted annually to obtain data on revenue, expenditure, debt, and employment of State and local governments. Universe is all governmental units in the U.S. (about 82,000).

Type of Data Collection Operation: Sample of about 22,000 units includes all State governments, county governments with 50,000+ population, municipalities and townships in certain States with 25,000+ population, all school districts with 5,000+ enrollment in October 1981, and other governments meeting certain criteria; probability sample for remaining units. A supplemental survey provides complete coverage of 39,000 local government units for data on taxes and intergovernmental revenue.

Data Collection and Imputation Procedures: Field and office compilation of data from official records and reports for States and large local governments; central collection of local governmental financial data through a number of State governments; mail canvass of other units with mail and telephone followups of nonrespondents. Data for nonresponses are imputed from previous year data or obtained from secondary sources, if available.

Estimates of Sampling Error: CV's for estimates of major employment and financial items are generally less than 2% for most States and less than 1.2% for the majority of States.

Other (nonsampling) Errors: Nonresponse rate is about 15% for number of units. Other possible errors may result from undetected inaccuracies in classification, response, and processing.

Sources of Additional Material: U.S. Bureau of the Census, *Public Employment in 1986*, GE 86, No. 1, *Governmental Finances in 1985-86*, GF 86, No. 5, and *Census of Governments, 1982*, various reports.

SECTION 10. FEDERAL GOVERNMENT

Source and Title: U.S. Internal Revenue Service, *Statistics of Income, Individual Income Tax Returns*

Tables: 506-510.

Universe, Frequency, and Types of Data: Annual study of unaudited individual income tax returns, Forms 1040, 1040A, and 1040EZ, filed by U.S. citizens and residents. Data provided on various financial characteristics by size of adjusted gross income, marital status, and by taxable and nontaxable returns. Data by State, based on 100% file, also include returns from 1040NR, filed by nonresident aliens plus certain self-employment tax returns.

Type of Data Collection Operation: Annual stratified probability sample alternates between approximately 83,000 and 120,000 returns broken into sample strata based on the larger of total income or total loss amounts as well as the size of business plus farm receipts. Sampling rates for sample strata varied from .02% to 100%.

Data Collection and Imputation Procedures: Computer selection of sample of tax return records. Data adjusted during editing for incorrect, missing, or inconsistent entries to ensure consistency with other entries on return.

Estimates of Sampling Error: Estimated CV's for tax year 1985: Number of returns in subgroups, ranged from .8% for returns under $5,000 to .2% for returns over $500,000; for adjusted gross income less deficit, .1%; and amount of income tax, .2%. (State data not subject to sampling error.)

Other (nonsampling) Errors: Processing errors and errors arising from the use of tolerance checks for the data.

Sources of Additional Material: U.S. Internal Revenue Service, *Statistics of Income, Individual Income Tax Returns*, annual.

SECTION 12. SOCIAL INSURANCE AND HUMAN SERVICES

Source and Title: U.S. Social Security Administration, *Benefit Data*

Tables: 578 and 579.

Universe, Frequency, and Types of Data: All persons receiving monthly benefits under Title 11 of Social Security Act. Data on number and amount of benefits paid by type and State.

Type of Data Collection Operation: Data based on administrative records. Data based on 100% files, as well as 10% and 1% sample files.

Data Collection and Imputation Procedures: Records used consist of actions pursuant to applications for benefits, updated by subsequent post-entitlement actions.

Estimates of Sampling Error: Varies by size of estimate and sample file size.

Other (nonsampling) Errors: Processing errors, which are believed to be small.

Sources of Additional Material: U.S. Social Security Administration, *Annual Statistical Supplement to the Social Security Bulletin.*

Source and Title: U.S. Social Security Administration, *Supplemental Security Income (SSI) Program*

Tables: 604-607.

Universe, Frequency, and Types of Data: All eligible aged, blind, or disabled persons receiving SSI benefit payments under SSI program. Data include number of persons receiving federally administered SSI, amounts paid, and State administered supplementation.

Type of Data Collection Operation: Data based on administrative records.

Data Collection and Imputation Procedures: Data adjusted to reflect returned checks and overpayment refunds. For federally administered payments, actual adjusted amounts are used; for State administered, payments are deflated for average rate across all States.

Estimates of Sampling Error: Not applicable.

Other (nonsampling) Errors: Processing errors, which are believed to be small.

Sources of Additional Material: U.S. Social Security Administration, *Annual Statistical Supplement to the Social Security Bulletin.*

(See section 1 above for information pertaining to the Current Population Survey; section 3 above for information pertaining to the Supplement on Aging to the National Health Interview Survey; and section 9 for information pertaining to Annual Surveys of State and Local Government.)

SECTION 13. LABOR FORCE, EMPLOYMENT, AND EARNINGS

Source and Title: U.S. Bureau of Labor Statistics (BLS), *Current Employment Statistics (CES) Program*

Tables: 655-657, 661, 663; in section 17, table 845; in section 21, table 999; in section 22, table 1052; and in section 24, table 1145.

Universe, Frequency, and Types of Data: Monthly survey covering about 4 million nonagricultural establishments to obtain data on employment, hours, and earnings, by industry.

Type of Data Collection Operation: Probability sample survey of over 300,000 establishments in March 1987.

Data Collection and Imputation Procedures: Cooperating State agencies mail questionnaires to sample establishments to develop State and local estimates; information is forwarded to BLS where national estimates are prepared.

Estimates of Sampling Error: Estimated CV's in 1986: For average weekly hours paid, .1% and for average hourly earnings, .2%.

Other (nonsampling) Errors: Incorrect responses believed to be somewhat offsetting. Estimates of employment adjusted annually to reflect complete universe. Average adjustment is .2%.

Sources of Additional Material: U.S. Bureau of Labor Statistics, *Employment and Earnings*, monthly, Explanatory Notes, tables L-Q and *BLS Handbook of Methods*, Bulletin 2285 (Apr. 1988).

(See section 1 above for information pertaining to the Current Population Survey.)

SECTION 14. INCOME, EXPENDITURES, AND WEALTH

(See section 1 above for information pertaining to the Bureau of the Census.)

SECTION 15. PRICES

Source and Title: U.S. Bureau of Labor Statistics (BLS), *Consumer Price Index (CPI)*

Tables: 748, 749, 758-761, 763, 770, 774, 775, and in section 3, table 144.

Universe, Frequency, and Types of Data: Monthly survey of price changes of all types of consumer goods and services purchased by urban wage earners and clerical workers prior to 1978, and urban consumers thereafter. Both indexes continue to be published.

Type of Data Collection Operation: Prior to 1978, sample of various consumer items in 56 urban areas; thereafter, in 85 PSU's, except from January 1987 through March 1988, when 91 areas were sampled.

Data Collection and Imputation Procedures: Prices of consumer items are obtained from about 57,000 housing units, and 19,000 other reporters in 85 areas. Prices of most goods and services are obtained monthly in the 5 largest areas and every 2 months in others.

Estimates of Sampling Error: Estimates of standard errors are not available at present.

Other (nonsampling) Errors: Errors result from inaccurate reporting, difficulties in defining concepts and their operational implementation, lack of systematic method for incorporating new outlets in the sample, and introduction of product quality changes and new products.

Sources of Additional Material: U.S. Bureau of Labor Statistics, *The Consumer Price Index: 1987 Revision*, Report 736, and *BLS Handbook of Methods*, Bulletin 2285.

Source and Title: U.S. Bureau of Labor Statistics, *Producer Price Index (PPI)*

Tables: 748, 749, 753-757; in section 21, table 1040; in section 24, table 1148; and in section 26, table 1219.

Universe, Frequency, and Types of Data: Monthly survey of producing companies to determine price changes of all commodities produced for sale in commercial transactions in primary markets in the U.S. Data on agriculture, forestry, fishing, manufacturing, mining, gas, electricity, and public utilities.

Type of Data Collection Operation: Probability sample of over 3,000 commodities and about 16,000 respondents.

Data Collection and Imputation Procedures: Data are collected by mail. If transaction prices are not supplied, list prices are used. Some prices are obtained from trade publications, organized exchanges, and government agencies. To calculate index, price changes multiplied by their relative weights based on total net selling value of all commodities in 1982.

Estimates of Sampling Error: Not applicable.

Other (nonsampling) Errors: Not available at present.

Sources of Additional Material: U.S. Bureau of Labor Statistics, *BLS Handbook of Methods*, Bulletin 2285.

SECTION 17. BUSINESS ENTERPRISE

Source and Title: U.S. Internal Revenue Service, *Statistics of Income, Sole Proprietorship Returns* and *Statistics of Income Bulletin*

Tables: 846-850.

Universe, Frequency, and Types of Data: Annual study of unaudited income tax returns of nonfarm sole proprietorships, Form 1040 with business or farm schedules. Data provided on various financial characteristics by industry.

Type of Data Collection Operation: Stratified probability sample of approximately 38,000 sole proprietorships for tax year 1985. The sample is classified based on presence or absence of certain business schedules; the larger of total income or loss; and size of business plus farm receipts. Sampling rates vary from .02% to 100%.

Data Collection and Imputation Procedures: Computer selection of sample of tax return records. Data adjusted during editing for incorrect, missing, or inconsistent entries to ensure consistency with other entries on return.

Estimates of Sampling Error: Estimated CV's for tax year 1983 (latest available): For sole proprietorships, number of nonfarm businesses, .24%; business receipts, 1.78%; net income, (less loss), 1.98%; and net income, 1.29%.

Other (nonsampling) Errors: Processing errors and errors arising from the use of tolerance checks for the data.

Sources of Additional Material: U.S. Internal Revenue Service, *Statistics of Income, Sole Proprietorship Returns* and *Statistics of Income Bulletin*, Vol. 7, No. 1 (Summer 1987).

Source and Title: U.S. Internal Revenue Service, *Statistics of Income, Partnership Returns* and *Statistics of Income Bulletin*

Tables: 846-849, 851, and 852.

Universe, Frequency, and Types of Data: Annual study of unaudited income tax returns of partnerships, Form 1065. Data provided on various financial characteristics by industry

Type of Data Collection Operation: Stratified probability sample of approximately 33,000 partnership returns filed for tax year 1985. The sample is classified based on combinations of gross receipts, total income or loss, and total assets, and on industry. Sampling rates vary from .1% to 100%.

Data Collection and Imputation Procedures: Computer selection of sample of tax return records. Data adjusted during editing for incorrect, missing, or inconsistent entries to ensure consistency with other entries on return.

Estimates of Sampling Error: Estimated CV's for tax year 1985 (latest available): For number of partnerships, .43%; business receipts, .63%; net income, 2.01%; and net loss, 1.38%.

Other (nonsampling) Errors: Processing errors and errors arising from the use of tolerance checks for the data.

Sources of Additional Material: U.S. Internal Revenue Service, *Statistics of Income, Partnership Returns* and *Statistics of Income Bulletin*, Vol. 7, No. 1 (Summer 1987).

Source and Title: U.S. Internal Revenue Service, *Corporation Income Tax Returns*

Tables: 846-849, and 856.

Universe, Frequency, and Types of Data: Annual study of unaudited corporation income tax returns, Forms 1120 and 1120 (L, M, S, F, IC-DISC, or FSC), filed by corporations or businesses legally defined as corporations. Data provided on various financial characteristics by industry and size of total assets, and business receipts.

Type of Data Collection Operation: Stratified probability sample of approximately 89,000 returns in 1985, broken into sample classes generally based on type of return, size of total assets, size of net income or deficit, and selected business activity. Sampling rates for sample strata varied from .4% to 100%.

Data Collection and Imputation Procedures: Computer selection of sample of tax return records. Data adjusted during editing for incorrect, missing, or inconsistent entries to ensure consistency with other entries on return and to achieve statistical definitions.

Estimates of Sampling Error: Estimated CV's for 1985: Number of returns in subgroups ranged from 1.2% with assets under $100,000, to 0% with assets over $100 mil.; for amount of net income and amount of income tax, .1%.

Other (nonsampling) Errors: Processing errors and errors arising from the use of tolerance checks for the data.

Sources of Additional Material: U.S. Internal Revenue Service, *Statistics of Income, Corporation Income Tax Returns*, annual.

SECTION 18. COMMUNICATIONS

(See section 27 for information pertaining to table 912.)

SECTION 19. ENERGY

Source and Title: U.S. Energy Information Administration, *Residential Energy Consumption Survey*
Tables: 934-937, 967, and table 1249 in section 26.
Universe, Frequency, and Types of Data: Triennial survey of households and fuel suppliers. Data are obtained on energy-related household characteristics, housing unit characteristics, use of fuels, and energy consumption and expenditures by fuel type
Type of Data Collection Operation: Probability sample of 6,752 eligible units in 149 PSU's. For responding units, fuel consumption and expenditure data obtained from fuel suppliers to those households.
Data Collection and Imputation Procedures: Personal interviews. Extensive followup of nonrespondents including mail questionnaires for some households. Adjustments for nonrespondents were made in weighting for respondents. Most item nonresponses were imputed.
Estimates of Sampling Error: Estimated CV's for household averages: For consumption or expenditures, 1.3%; for various fuels, values ranged from 1.9% for electricity to 5.3% for LPG.
Other (nonsampling) Errors: Household response rate of 84.2%. Non-consumption data were mostly imputed for mail respondents (3.0% of eligible units). Complete responses from fuel suppliers for various fuels ranged from 83.4% for electricity to 48.3% for fuel oil and kerosene.
Sources of Additional Material: U.S. Energy Information Administration, *Residential Energy Consumption Survey: Consumption and Expenditures, April 1984 through March 1985.*

SECTION 21. TRANSPORTATION—LAND

(See section 2 for information pertaining to table 101[illegible] and section 15 for table 1040.)

SECTION 22. TRANSPORTATION—AIR AND WATER

Source and Title: U.S. Bureau of the Census, *Foreign Trade—Export Statistics*
Tables: See Bureau of the Census citations for export statistics in source notes in sections 22 and 29 and also tables 1171 and 1172 in section 24; 1184 in section 25; and 1396 in section 30.
Universe, Frequency, and Types of Data: The export declarations collected by Customs are processed each month to obtain data on the movement of U.S. merchandise exports to foreign countries. Data obtained include value, quantity, and shipping weight of exports by commodity, country of destination, Customs district of exportation, and mode of transportation.
Type of Data Collection Operation: Shipper's Export Declarations are required to be filed for the exportation of merchandise valued over $1,500. Customs officials collect and transmit the documents to the Bureau of the Census on a flow basis for data compilation. Value data for shipments valued under $1,501 are estimated, based on established percentages of individual country totals.
Data Collection and Imputation Procedures: Statistical copies of Shipper's Export Declarations are received on a daily basis from Customs ports throughout the country and subjected to a monthly processing cycle. They are fully processed to the extent they reflect items valued over $1,500. Estimates for shipments valued at $1,500 or less are made, based on established percentages of individual country totals.
Estimates of Sampling Error: Not applicable.
Other (nonsampling) Errors: Clerical and complex computer checks intercept most processing errors and minimize otherwise significant reporting errors; other nonsampling errors are caused by undercounting of exports to Canada due to the nonreceipt of some Shipper's Export Declarations.
Sources of Additional Material: U.S. Bureau of the Census, *U.S. Exports, Schedule E, Commodity by Country*, FT 410.

Source and Title: U.S. Bureau of the Census, *Foreign Trade—Import Statistics*
Tables: See Bureau of the Census citations for import statistics in source notes in sections 22 and 29 and also tables 1171 and 1172 in section 24; 1184 in section 25; and 1396 in section 30.
Universe, Frequency, and Types of Data: The import entry documents collected by Customs are processed each month to obtain data on the movement of merchandise imported into the United States. Data obtained include value, quantity, and shipping weight by commodity, country of origin, Customs district of entry, and mode of transportation.
Type of Data Collection Operation: Import entry documents are required to be filed for the importation of goods into the United States valued over $1,000 or for articles which must be reported on formal entries. Customs officials collect and transmit statistical copies of the documents to the Bureau of the Census on a flow basis for data compilation. Estimates for shipments valued under $1,001 and not reported on formal entries are based on established percentages of individual country totals.

Data Collection and Imputation Procedures: Statistical copies of import entry documents, received on a daily basis from Customs ports of entry throughout the country, are subjected to a monthly processing cycle. They are fully processed to the extent they reflect items valued at $1,001 and over or items which must be reported on formal entries.

Estimates of Sampling Error: Not applicable.

Other (nonsampling) Errors: Verification of statistical data reporting by Customs officials prior to transmittal and a subsequent program of clerical and computer checks are utilized to hold nonsampling errors arising from reporting and/or processing errors to a minimum.

Sources of Additional Material: U.S. Bureau of the Census, *U.S. General Imports and Imports for Consumption, Schedule A, Commodity by Country,* FT 135.

SECTION 23. AGRICULTURE

Source and Title: U.S. Department of Agriculture, National Agricultural Statistics Service (NASS), formerly Statistical Reporting Service (SRS), *Basic Area Frame Sample*

Tables: See tables citing NASS in source notes in section 23, which pertain to this or the following two surveys.

Universe, Frequency, and Types of Data: Two annual area sample surveys of U.S. farm operators: June agricultural survey collects data on planted acreage and livestock inventories; and a February Farm Costs and Returns survey that collects data on total farm production, expenses and specific commodity costs of production.

Type of Data Collection Operation: Stratified probability sample of about 16,000 land area units of about 1 sq. mile (range from .1 sq. mile in cities to several sq. miles in open grazing areas). Sample includes 60,000 parcels of agricultural land. About 20% of the sample replaced annually.

Data Collection and Imputation Procedures: Data collection is by personal enumeration. Imputation is based on enumerator observation or data reported by respondents having similar agricultural characteristics.

Estimates of Sampling Error: Estimated CV's range from 1-2% for regional estimates to 3-6% for State estimates of livestock inventories.

Other (nonsampling) Errors: Minimized through rigid quality controls on the collection process and careful review of all reported data.

Sources of Additional Material: U.S. Department of Agriculture, SRS, *Scope and Methods of the Statistical Reporting Service,* (name changed to National Agricultural Statistics Service), Miscellaneous Publication No. 1308, September 1983 (revised).

Source and Title: U.S. Department of Agriculture, National Agricultural Statistics Service (NASS), *Multiple Frame Surveys*

Tables: See tables citing NASS in source notes in section 23, which pertain to this or the following survey.

Universe, Frequency, and Types of Data: Surveys of U.S. farm operators to obtain data on major livestock inventories, selected crop acreages and production, grain stocks, and farm labor characteristics; and to obtain farm economic data for price indexing.

Type of Data Collection Operation: Primary frame is obtained from general or special purpose lists, supplemented by a probability sample of land areas used to estimate for list incompleteness.

Data Collection and Imputation Procedures: Mail, telephone or personal interviews used for initial data collection. Mail nonrespondent followup by phone and personal interviews. Imputation based on average of respondents.

Estimates of Sampling Error: Estimated CV for number of hired farm workers is about 3%. Estimated CV's range from 1-2% for regional estimates to 3-6% for State estimates of livestock inventories.

Other (nonsampling) Errors: In addition to above, replicated sampling procedures used to monitor effects of changes in survey procedures.

Sources of Additional Material: U.S. Department of Agriculture, SRS, *Scope and Methods of the Statistical Reporting Service,* (name changed to National Agricultural Statistics Service), Miscellaneous Publication No. 1308, September 1983 (revised).

Source and Title: U.S. Department of Agriculture, National Agricultural Statistics Service (NASS), *Objective Yield Surveys*

Tables: See tables citing NASS in source notes in section 23, which pertain to this or the preceding survey.

Universe, Frequency, and Types of Data: Surveys for data on corn, cotton, potatoes, soybeans, wheat, and rice to forecast and estimate yields.

Type of Data Collection Operation: Random location of plots in probability sample of fields. Fields selected in June from Basic Area Frame Sample (see above).

ata Collection and Imputation Procedures: Enumerators count and measure plant characteristics in sample fields. Production measured from plots at harvest. Harvest loss measured from post harvest gleanings.

stimates of Sampling Error: CV's for national estimates of production are about 2-3%.

ther (nonsampling) Errors: In addition to above, replicated sampling procedures used to monitor effects of changes in survey procedures.

ources of Additional Material: U.S. Department of Agriculture, SRS. *Scope and Methods of the Statistical Reporting Service,* (name changed to National Agricultural Statistics Service), Miscellaneous Publication No. 1308, September 1983 (revised).

(See section 1 above for information pertaining to the Census of Population and Current Populaon Survey.)

SECTION 26. CONSTRUCTION AND HOUSING

ource and Title: U.S. Bureau of the Census, *Monthly Survey of Construction*
ables: 1228, 1229, and 1231-1234.

niverse, Frequency, and Types of Data: Survey conducted monthly of newly constructed housing units (excluding mobile homes, and nonhousekeeping residential buildings such as motels, hotels, courts and cabins). Data are collected on the start, completion, and sale of housing. (Annual figures are aggregates of monthly estimates.)

ype of Data Collection Operation: Probability sample of housing units obtained from building permits selected from 16,000 permit-issuing places through 1984 and, beginning in 1985, 17,000 places. For nonpermit places, multistage probability sample of new housing units selected in 169 PSU's. In those areas, all roads are canvassed in selected enumeration districts.

ata Collection and Imputation Procedures: Data are obtained by telephone inquiry and field visit.

stimates of Sampling Error: Estimated CV of 3% to 4% for estimates of national totals, but are as high as 20% for estimated totals of more detailed characteristics, such as housing units in multiunit structures.

ther (nonsampling) Errors: Response rate is over 90% for most items. Nonsampling errors are attributed to definitional problems, differences in interpretation of questions, incorrect reporting, inability to obtain information about all cases in the sample, and processing errors.

urces of Additional Material: U.S. Bureau of the Census, *Construction Reports,* series C20, *Housing Starts;* C22, *Housing Completions;* C25, *New One-Family Houses Sold and For Sale;* and C27, *Price Index of New One-Family Houses Sold.*

urce and Title: U.S. Bureau of the Census, *Value of New Construction Put in Place*
bles: 1221-1223.

iverse, Frequency, and Types of Data: Survey conducted monthly on total value of all construction put in place in the current month, both public and private projects. Construction values nclude costs of materials and labor, contractors' profits, overhead costs, cost of architectural and engineering work, and miscellaneous project costs. (Annual figures are aggregates of monthy estimates.)

pe of Data Collection Operation: Varies by type of activity: Total cost of private one-family houses started each month is distributed into value put in place using fixed patterns of monthly construction progress; using a multistage probability sample, data for private multifamily housing are obtained by mail from owners of multiunit projects. Data for residential additions and alterations are obtained in a quarterly survey measuring expenditures; monthly estimates are interpoated from quarterly data. Estimates of value of private nonhousekeeping, nonresidential buildngs, and State and local government construction are obtained by mail from owners (or agents) or a probability sample of projects. Estimates of farm nonresidential construction expenditures are based on U.S. Department of Agriculture annual estimates of construction; public utility estimates are obtained from reports submitted to Federal regulatory agencies and from private utility ompanies; estimates for all other private construction (nonbuilding) are obtained by phasing F. W. Dodge contract award data; estimates of Federal construction are based on monthly data upplied by Federal agencies.

ta Collection and Imputation Procedures: See "Type of Data Collection Operation." Imputaion accounts for approximately 20% of estimated value of construction each month.

imates of Sampling Error: CV estimates for private nonresidential building construction range rom 3% for estimated value of industrial buildings to 10% for miscellaneous buildings. CV is pproximately 2% for total new private nonresidential buildings.

er (nonsampling) Errors: For directly measured data series based on samples, some nonsamling errors may arise from processing errors, imputations, and misunderstanding of questions. ndirect data series are dependent on the validity of the underlying assumptions and procedures.

Sources of Additional Material: U.S. Bureau of the Census, *Construction Reports*, series C30, *Value of New Construction Put in Place*.

Source and Title: U.S. Bureau of the Census, *Census of Housing*
Tables: 1243 and 1248.
Universe, Frequency, and Types of Data: Census of all occupied and vacant housing, excluding group quarters, conducted every 10 years as part of the decennial census (see section 1 above) to determine characteristics of U.S. housing.
Type of Data Collection Operation: For 1970 and 1980, a complete count of 12 housing items. In 1970, other items collected from 5% and 15% probability samples selected from two sets of detailed questions on housing (these two sets having some common items). In 1980, approximately 19% of the housing units were included in the sample.
Data Collection and Imputation Procedures: In 1970, a self-enumeration census using a mail-out/mail-back procedure was used in most areas. In 1980, mail questionnaires were used - in even more areas than in 1970, with personal interviews in the remainder. Followup for nonrespondents and identification of vacant units done by phone and personal visit.
Estimates of Sampling Error: Sampling errors for data are estimated for all items collected by sample and vary by characteristic and geographic area.
Other (nonsampling) Errors: Evaluation studies for 1980 estimated the underenumeration of occupied housing units at 1.5%. The missed rate in 1980 for all units was 2.6% or approximately 2.3 million units, 1 million of which were vacant housing units.
Sources of Additional Material: U.S. Bureau of the Census, *1980 Census of Population and Housing, The Coverage of Housing in the 1980 Census*, PHC80-E1, July 1985.

Source and Title: U.S. Bureau of the Census, *American Housing Survey*
Tables: See tables citing *American Housing Survey* in source notes.
Universe, Frequency, and Types of Data: Conducted nationally in the fall in odd numbered years to obtain data on the approximately 100 million occupied or vacant housing units in the U.S. (group quarters are excluded). Data include characteristics of occupied housing units, vacant units, new housing and mobile home units, financial characteristics, recent mover households, housing and neighborhood quality indicators, and energy characteristics.
Type of Data Collection Operation: The national sample was a multistage probability sample with about 44,300 units eligible for interview in 1985. Sample units, selected within 394 PSU's, were surveyed over a 5-month period.
Data Collection and Imputation Procedures: For 1985, the survey was conducted by personal interviews. The interviewers obtained the information from the occupants or, if the unit was vacant, from informed persons such as landlords, rental agents, or knowledgable neighbors.
Estimates of Sampling Error: For the national sample, illustrations of the S.E. of the estimates are provided in the appendix B of the 1985 report. As an example, the estimated CV is about .5% for the estimated percentage of owner occupied units with 2 persons.
Other (nonsampling) Errors: Response rate was about 96%. Nonsampling errors may result from incorrect or incomplete responses, errors in coding and recording, and processing errors. For the 1985 national sample, approximately 6% of the total housing inventory was not adequately represented by the AHS sample.
Sources of Additional Material: U.S. Bureau of the Census, *Current Housing Reports*, series H-150 and H-170, *American Housing Survey*.

(See section 1 above for information pertaining to the Census of Population and section 15 pertaining to table 1239.)

SECTION 27. MANUFACTURES

Source and Title: U.S. Bureau of the Census, *Census of Manufactures*
Tables: See tables citing *Census of Manufactures* in source notes in section 27 and also table 912 in section 18 and tables 1394 and 1399 in section 30.
Universe, Frequency, and Types of Data: Conducted every five years to obtain information on labor materials, capital input and output characteristics, plant location, and legal form of organization for all plants in the United States with one or more employees. Universe was 350,000 manufacturing establishments in 1982.
Type of Data Collection Operation: Complete enumeration of data items obtained from 205,000 firms. Administrative records from Internal Revenue Service and Social Security Administration are used for 145,000 smaller single-location firms, which were determined by various cutoffs based on size and industry.
Data Collection and Imputation Procedures: Five mail and telephone followups for larger nonrespondents. Data for small single-location firms (generally those with fewer than 10 employees) not mailed census questionnaires were estimated from administrative records of IRS and SSA.

Data for nonrespondents were imputed from related responses or administrative records from IRS and SSA. Approximately 3.7% of total value of shipments was represented by fully imputed records in 1977 (1982 not available).

Estimates of Sampling Error: Not applicable.

Other (nonsampling) Errors: Based on evaluation studies, estimates of nonsampling errors for 1972 were about 1.3% for estimated total payroll; 2% for total employment; and 1% for value of shipments. Estimates for later years are not available.

Sources of Additional Material: U.S. Bureau of the Census, *Census of Manufactures, 1977,* vol. I, *Subject and Special Statistics.*

Source and Title: U.S. Bureau of the Census, *Annual Survey of Manufactures*

Tables: See tables citing *Annual Survey of Manufactures* in source notes.

Universe, Frequency, and Types of Data: Conducted annually to provide basic measures of manufacturing activity for intercensal years for all manufacturing establishments having one or more paid employees.

ype of Data Collection Operation: Sampling frame is 350,000 establishments in the 1982 Census of Manufactures (see above), supplemented by Social Security Administration lists of new manufacturers and new manufacturing establishments of multi-establishment companies identified annually by the Census Bureau's Company Organization Survey. A probability sample of 55,000 establishments is selected. All establishments of companies with more than $550 million of manufacturing shipments in 1982 are included with certainty. All establishments with 250+ employees are also included along with a probability sample of smaller establishments.

ata Collection and Imputation Procedures: Survey is conducted by mail with phone and mail followups of nonrespondents. Imputation (for all nonresponse items) is based on previous year reports, or for new establishments in survey, on industry averages.

stimates of Sampling Error: Estimated CV's for number of employees, new expenditure, and for value added totals are given in annual publications. For U.S. level industry statistics, most estimated CV's are 2% or less, but vary considerably for detailed characteristics.

ther (nonsampling) Errors: Response rate is about 85%. Nonsampling errors include those due to collection, reporting, and transcription errors, many of which are corrected through computer and clerical checks.

ources of Additional Material: U.S. Bureau of the Census, *Annual Survey of Manufactures,* and Technical Paper 24.

SECTION 28. DOMESTIC TRADE AND SERVICES

ource and Title: U.S. Bureau of the Census, *Census of Wholesale Trade, Census of Retail Trade, Census of Service Industries*

ables: See tables citing the above censuses in source notes in section 28 and table 1399 in section 30.

niverse, Frequency, and Types of Data: Conducted every five years to obtain data on number of establishments, number of employees, total payroll size, and total sales. In 1977, universe was all employer establishments primarily engaged in wholesale trade, and employer and nonemployer establishments in retail trade or service industries. In 1982, for service industries and retail trade summary data for all establishments are available; kind of business detail by State is available only for establishments with payroll.

ype of Data Collection Operation: All wholesale firms with paid employees surveyed; all retail and service large employer firms surveyed (i.e. all employer firms above the payroll size cutoff established to separate large from small employers) plus a 10-percent sample of smaller employer firms. Firms with no employees were not required to file a census return.

ata Collection and Imputation Procedures: Mail questionnaire is utilized with both mail and telephone followups for nonrespondents. Data for nonrespondents and "nonselected" firms in retail trade and service industries are obtained from administrative records of IRS and the Social Security Administration.

stimates of Sampling Error: Not applicable.

her (nonsampling) Errors: Response rate in 1982 of 87% for single establishment firms; 91% for multi-establishment firms. Item response ranged from 60% to 90% with higher rates for less detailed questions.

ources of Additional Material: U.S. Bureau of the Census, Appendix A of *Census of Retail Trade; Census of Service Industries; Census of Wholesale Trade;* and *History of the 1982 Economic Censuses,* February 1987.

urce and Title: U.S. Bureau of the Census, *Current Business Surveys*

bles: 1328-1331, and 1343.

Universe, Frequency, and Types of Data: Provides monthly estimates of retail sales by kind of business and geographic area, and end-of-month inventories of retail stores; wholesale sales and end-of-month inventories; and annual receipts of selected service industries. (Service monthly survey discontinued after Dec. 1981.)

Type of Data Collection Operation: Probability sample of all firms from a list frame and, additionally, for retail and service an area frame. List frame is the Bureau's Standard Statistical Establishment List (SSEL) updated quarterly for recent "births" from the Social Security Administration list of establishments having an employer identification number. The largest firms are included monthly; a sample of others is included every three months on a rotating basis. The area frame covers businesses not subjected to sampling on the list frame.

Data Collection and Imputation Procedures: Data are collected by mail questionnaire with telephone followups for nonrespondents. Imputation made for each nonresponse item and each item failing edit checks.

Estimates of Sampling Error: For 1986, CV's are about .7% for estimated total retail sales, 1.5% for wholesale sales, 1.3% for wholesale inventories. For dollar volume of receipts, CV's from the *Service Annual Survey* vary by kind of business and range between 1.5% to 15.0%. Sampling errors are shown in monthly publications.

Other (nonsampling) Errors: Imputation rates are about 18%-23% for monthly retail sales and wholesale sales and about 25%-30% for monthly wholesale inventories and 14% for the *Service Annual Survey.*

Sources of Additional Material: U.S. Bureau of the Census, *Current Business Reports, Monthly Retail Trade, Monthly Wholesale Trade,* and *Service Annual Survey.*

1989

Appendix IV

Index to Tables Having Historical Statistics, Colonial Times to 1970 Series

[The most recent historical supplement to the *Statistical Abstract* is the bicentennial edition, *Historical Statistics of the United States, Colonial Times to 1970* (see inside back cover). Listed below are statistical time series (identified by number) appearing in this edition, for which tables in the *Statistical Abstract* present comparable figures. Historical series are listed only where related or comparable data are available for one or more years later than 1970. In a few instances, it may be necessary to combine figures shown in the *Abstract* to obtain totals comparable to the series shown in *Historical Statistics*]

Listing of Tables Deleted from the 1988 Edition of the Statistical Abstract

Table Titles

1988 Table number	Table Titles	1988 Page number
	Sec. 1. **POPULATION**	
3	Population and Area—United States and Outlying Areas: 1960 to 1980	8
12	Refugee Arrivals by Selected Area of Citizenship and State: 1980 to 1986	12
22	Population, by Size-Class of States: 1970 to 1986	20
36	Number of Counties and Population, 1986, by Division and Percent Change in County Population, 1980–1986	31
52	Ever-Married Persons 25–54 Years Old Who Were Divorced or Separated at Time of Survey, by Race, Sex, and Age: 1970 to 1986	41
	Sec. 2. **VITAL STATISTICS**	
97	Ability to Bear Children of Currently Married Couples, by Age of Wife, Number of Prior Births, and Race: 1982	66
101	Unwanted Births of Ever-Married Women, 15–44 Years Old: 1973 and 1982	68
102	Family Planning Services—Visits per 1,000 Women 15–44 Years Old: 1982	68
	Sec. 3. **HEALTH AND HOSPITALS**	
151	Physician Expenses and Malpractice Insurance Premiums, by Selected Specialty: 1982 and 1984	96
168	Percent of Children Immunized Against Specified Diseases, by Age-Group: 1980 to 1985	106
179	Frequency of Alcohol Consumption by Sex, Age, and Family Income: 1984	112
181	Current Users of Alcohol, Marihuana, and/or Cocaine: 1985	112
	Sec. 4. **EDUCATION**	
198	Preprimary School Enrollment of Children 3 to 5 Years Old: 1970 to 1986	123
200	Public Elementary and Secondary Schools, by Grade Span—States: 1985	124
219	Instructional Use of Computers in Elementary and Secondary Schools: 1985	134
222	Public Elementary and Secondary Students in Educational Programs for the Handicapped, by Type of Handicap and Educational Environment: 1985	135
231	Mean Money Earnings, by Age, Sex, and Educational Attainment: 1985	139
238	Changes in Enrollment in Remedial College Courses, 1978 to 1984, and Freshmen Enrollment in Remedial College Courses, 1984	142
239	College Enrollment, by Selected Major Field of Study and Sex: 1976 and 1984	143
	Sec. 5. **LAW ENFORCEMENT, COURTS, AND PRISONS**	
281	Home Crime Prevention Measures Undertaken by Households: 1984	166
282	Security Measures at Work Place, by Size of Establishment: 1984	166
302	Jails—Summary: 1983	174
304	Jail Inmates—Selected Characteristics: 1983	175
306	Federal and State Prisoners, by Sex and Race: 1978 to 1985	175
307	State Correctional Facilities—Summary: 1984	175
	Sec. 6. **GEOGRAPHY AND ENVIRONMENT**	
335	Population Served by Sewer Systems, by Degree of Treatment: 1960 to 1986	194
337	Pesticide Residues in Human Adipose Tissue—Concentration Levels: 1970 to 1983	194

1988 Table number		1988 Page number
	Sec. 8. **ELECTIONS**	
410	Members of Congress—Seniority and Occupation: 1981 to 1987	244
	Sec. 10. **FEDERAL GOVERNMENT FINANCES AND EMPLOYMENT**	
484	Consolidated Statement of Financial Position of the United States Government: 1980 to 1986	300
502	Paid Civilian Employment in the Federal Government, by Agency, All Areas, Summary: 1980 and 1986	310
	Sec. 11. **NATIONAL DEFENSE AND VETERANS AFFAIRS**	
513	Defense Purchases, National Income and Product Account (NIPA) Basis: 1980 to 1986	316
515	Employment—Defense-Related Agencies: 1970 to 1986	316
520	Arms Export Market Share: 1975 to 1985	319
526	Estimated U.S. Strategic Nuclear Forces: 1987	322
527	Estimated Soviet Union Strategic Nuclear Forces: 1987	322
528	Department of Defense—Active Duty Military Personnel: 1940 to 1986	323
529	Department of Defense Personnel, Payroll, and Military Retirees: 1950 to 1986	323
538	Monthly (January) Rates of Military Basic Pay: 1984 to 1987	325
	Sec. 12. **SOCIAL INSURANCE AND HUMAN SERVICES**	
567	Individual Retirement Account (IRA), Keogh Account and Pension Plan Coverage of Employed Persons: 1983	344
	Sec. 13. **LABOR FORCE, EMPLOYMENT AND EARNINGS**	
615	Selected Measures of Work Schedules, by Sex, Occupation and Industry: 1985	369
616	Employed Persons Working at Home, by Selected Characteristic: 1985	370
637	Displaced Workers, by Division of Residence and Selected Characteristics: 1986	383
658	Work Disability Status, by Occupation, Health and Pension Coverage, and Industry: 1987	397
	Sec. 14. **INCOME, EXPENDITURES, AND WEALTH**	
706	Married-Couple Families with Earnings, by Work Experience in 1983 of Husbands and Wives	430
723	Top Wealthholders with Gross Assets of $300,000 or More, by Size of Net Worth and Sex: 1982	438
724	Top Wealthholders with Gross Assets of $300,000 or More, by State of Residence: 1982	439
725	Top Wealthholders with Gross Assets Greater Than $500,000, by Size of Net Worth and Type of Asset: 1982	439
	Sec. 15. **PRICES**	
753	Seafood Prices: 1970 to 1984	459
	Sec. 16. **BANKING, FINANCE AND INSURANCE**	
789	Finance Companies—Assets and Liabilities: 1975 to 1985	478
799	Households Owning Interest-Earning Assets, by Selected Characteristic: 1984	482
	Sec. 17. **BUSINESS ENTERPRISE**	
836	Business Failures by Industry Sector: 1984 to 1986	501
849	Fixed Nonresidential Private Capital Valued in Current and Constant (1982) Dollars: 1970 to 1986	508
850	Fixed Nonresidential Business Capital—Average Age of Gross Stocks, Using Constant (1982) Cost Valuation: 1970 to 1986	508
865	Manufacturing Corporations—Sales, Profits, Stockholders' Equity, and Debt: 1960 to 1986	516

1988 Table number		1988 Page number
	Sec. 18. **COMMUNICATIONS**	
873	U.S. Postal Service Revenues: 1970 to 1986	521
874	U.S. Postal Service Employees, by Type: 1970 to 1986	521
	Sec. 20. **SCIENCE**	
954	Funds for Performance of Industrial Research and Development (R&D), by Industry: 1970 to 1985	560
	Sec. 21. **TRANSPORTATION—LAND**	
977	Personal Consumption Expenditures for Transportation: 1970 to 1986	569
1005	Volume and Characteristics of Travel: 1983	582
1006	Household Motor Vehicles, Miles Driven, and Motor Fuel Expenditures, by Household Characteristic: 1985	582
1009	Gasoline Retail Prices—Selected Countries: 1973 to 1986	583
	Sec. 23. **AGRICULTURE**	
1079	Farm Income, 1985 and 1986, and Income/Debt Ratio, 1986, by State	619
	Sec. 24. **FORESTS AND FISHERIES**	
1136	Fisheries—Domestic Catch and Ex-Vessel Value by Area: 1980 to 1986	646
1141	Catch and Catch Limits in the U.S. Exclusive Economic Zone (EEZ) by Country: 1982 to 1986	648
	Sec. 25. **MINING AND MINERAL PRODUCTS**	
1155	Mineral Industries—States: 1972 to 1982	656
1166	Crude Petroleum and Refined Products: 1973 to 1986	662
1167	Petroleum—Runs to Stills and Refinery Products, by Product: 1973 to 1986	662
1170	Petroleum Inventories at the Beginning of Peak Seasons: 1975 to 1986	664
	Sec. 26. **CONSTRUCTION AND HOUSING**	
1202	Value of New Construction Put in Place in Constant (1982) Dollars: 1970 to 1986	680
1221	Housing Units—Summary of Characteristics: 1960 to 1983	688
1222	Housing Units—Selected Characteristics, by State: 1980	689
1224	Occupied Housing Units—Financial Summary: 1970 to 1983	690
1226	Occupied Housing Units—Primary Heating Fuel and Equipment, by Selected Characteristics: 1984	691
1228	Housing Units—Characteristics by Square Footage of Floor Space: 1980 to 1984	692
	Sec. 27. **MANUFACTURES**	
1269	Filament Yarn and Staple and Tow Shipments and Trade: 1980 to 1985	720
	Sec. 28. **DOMESTIC TRADE AND SERVICES**	
1308	Retail Trade—Sales by Broad Merchandise Lines: 1977 and 1982	739
	Sec. 29. **FOREIGN COMMERCE AND AID**	
1348	Percent Distribution of U.S. Domestic Exports and General Imports, by Broad Commodity Groups: 1970 to 1986	775
	Sec. 31. **COMPARATIVE INTERNATIONAL STATISTICS**	
1377	World Vital Statistics and Life Expectancy, 1965 to 1985, and Projections, 1985 to 2005	794
1380	Urban Population; Growth, Birth, and Death Rates; Life Expectancy; and Infant Mortality—Selected Countries	800
1384	Selected Measures of Hospital and Physician Utilization—Selected Countries: 1983	803
1402	Labor Force Participation Rates, by Sex, and Females as Percent of Total Labor Force—Selected Countries: 1970 to 1986	812

Index

Table

A

- Abortions 103-105
- Abrasives 1176, 1177
- Absent without authority (military personnel) 552
- Accidents and fatalities 176,1001,1018, 1024, 1037, 1185
  - Aircraft 124, 1001, 1044, 1048
  - Deaths and death rates 115, 117, 118, 124
    - Foreign countries 1407
    - Infants 115
  - Drownings 117, 124
  - Falls 117, 124
  - Fires 330
  - Industrial 124, 680, 681, 1185
  - Motor vehicles 117, 124, 176, 1018, 1022, 1024
  - Motorcycle 1018-1020
  - Police officers assaulted, killed 295
  - Railroad 1037, 1040
  - Tanker casualties 1070
  - Transportation 124, 1001
- Accounting, auditing, and bookkeeping:
  - Earnings 1339, 1346, 1347
  - Employees 1339, 1346, 1347
  - Establishments 1339, 1346, 1347
  - Receipts 1348
- Accounting machines, shipments 1306
- Acquired immuno-deficiency syndrome (AIDS) 177-181
- Aquisition of territory by the U.S. 332, 334, 335
- Adjustable rate mortgages (ARM's) 1247
- Admission to Statehood 331
- Adoptions 612
- Advertising:
  - Earnings 657, 1346.1347
  - Employees 645, 657, 1346, 1347
  - Establishments 1346, 1347
  - Receipts 1348
- Aeronautics, civil. See Air transportation.
- Aerospace industry:
  - Capital 1053
  - Earnings 1051, 1053
  - Employees 1051, 1053
  - Foreign trade 1053, 1056
  - New orders, backlog[1] 1054
  - Sales 992, 1054
  - Shipments 1053
- Afghanistan. See Foreign countries.
- AFL-CIO 682
- Africa. See Foreign countries.
- Age of population. See Population.
- Aggravated assault 277-280, 285, 293
- Agricultural loans. See Farm mortgage loans.
- Agricultural nonprofit associations 82
- Agricultural prices 772
- Agricultural products. See Farms and individual products.
- Agricultural sciences:
  - Degrees conferred 267, 270, 271
  - Employment 987
- Agricultural services:
  - Earnings 1393
  - Employees 645, 646, 650, 1393
  - Gross national product 1390, 1391
- Agriculture (see also Farms and Farmers and farmworkers):
  - Advertising expenditures 922-924
  - Aid to foreign countries (Public Law 480) 1364
  - Balance sheet of the farming sector 1089
  - Employees 642, 1279
  - Employment projections 641
  - Federal aid to State and local governments 451
  - Federal expenditures 490, 974
  - Financial stress indicators 1092
  - Outlying areas of U.S. 1398
  - Unemployment 450
    - Rate 651
- Agriculture, forestry, and fishing industry:
  - Earnings 393, 660
  - Employees 645, 1074, 1393
  - Establishments 848, 849
  - Finances 848, 849
  - Gross national product 686, 696
  - Occupational safety 680, 681
  - Profits 848, 869
  - Sales, shipments, receipts 848, 869

Table

- Agriculture, forestry, and fishing industry—Continued
  - Starts and failures 865
  - Value added 1074
- Aid to families with dependent children 570, 604, 607, 610
- AIDS (acquired immuno-deficiency syndrome) 177-181
- Air conditioning:
  - Homes with 1241, 1249
  - Shipments and retail value 1321
- Air Force, Department of, personnel 544, 548, 549, 551
- Air pollution 344-348
  - Expenditures for abatement 353-355, 357
- Air traffic control specialists 1050
- Air traffic hubs, summary 1045
- Air transportation:
  - Accidents and deaths 124, 1001, 1044, 1047
  - Air traffic hubs 1045
  - Certificated route air carriers, summary 1044.1050
    - Revenues and expenses, summary 1043, 1050
    - Service and traffic 1037
  - Civil aviation 1050
    - Employees 409
    - Receipts 409
  - Consumer complaints 1048
  - Cost indexes 1046
  - Federal outlays 1002
  - Hijacking incidents 1047
  - Passenger outlays 998
  - Regional airlines 1049
  - Scheduled air carrier operations 1044
  - Traffic carried 405, 1000, 1037, 1044, 1049
- Air transportation industry:
  - Earnings 657
  - Employees 657
  - Finances 409, 1043, 1046
  - Foreign trade 1056
  - Occupational safety 661
  - Productivity 655
  - Profits 884
  - Sales 884
  - Starts and failures 865
- Aircraft and parts, manufacturing:
  - Earnings 657, 1051, 1052, 1265
  - Employees 657, 1051, 1052, 1265
  - Establishments 1265
  - Finances 887, 1046
  - Foreign trade 1056, 1376, 1377
  - Inventories 1272
  - Research and development 976, 982
  - Sales, shipments, receipts 887, 1044, 1051, 1054, 1265, 1272, 1319
  - Value added 1265
- Aircarft carriers 540
- Airlift and sealift forces 540
- Airline operations (see also Air transportation) 1043, 1044, 1049
- Airmail service 997
- Airports or airfields 523, 1002, 1050
  - Airport and airway trust fund 491
  - City expenditures 471
  - Federal aid to State and local government 451
  - Federal outlays 1002
  - Serving large air traffic areas or hubs 1045
  - Serving regional airlines 1049
- Alabama. See State data.
- Alaska. See State data.
- Alaska purchase 332-334
- Albania. See Foreign countries.
- Alcoholic beverages (see also Liquors and beverages):
  - Consumer expenditures 688, 689
  - Consumption 190, 191, 196, 1287
  - Drinking ages 465
  - Expenditures 710
  - Production 1287
- Aleut population 45
- Alewives, catch 1161, 1165
- Algeria. See Foreign countries.
- Aliens 296-299, 406, 407
  - Admitted 298
  - Border patrol activities 297
  - Criminal violations 298
  - Deported 296-298
  - Violations and prosecutions 298

Table

U.S. GOVERNMENT PRINTING OFFICE : 1989 O - 233-736 : QL 3

STATISTICAL ABSTRACT SUPPLEMENTS

County and City Data Book, 1988. This latest in a series of publications presents 203 statistical data items for each State and county in the United States, 134 data items for 952 incorporated cities having 25,000 or more inhabitants in 1980, and 4 items for approximately 13,300 incorporated places and minor civil divisions also. New population data, including age estimates, are featured along with vital statistics, health, crime, personal income, and other data. Also featured are rankings for selected data items and a new appendix on county seats. Price $36 (clothbound.)

State and Metropolitan Area Data Book, 1986. This third edition in a series presents a vast array of data items for each of the 50 States, the District of Columbia, non-New England metropolitan statistical areas, New England county metropolitan areas, all component counties and central cities. Includes data from both Government and private agencies. Similar in content to the *County and City Data Book,* though presenting more trend data, this edition features 1,873 data items for States; 298 data items for metropolitan areas; and 86 data items for central cities. Also presented are comparative rankings for metropolitan areas and States on a variety of demographic and economic measures, descriptive text, explanatory notes, and source citations. Issued 1986. Price $28 (clothbound.)

Historical Statistics of the United States, Colonial Times to 1970. A two-part compendium of more than 12,500 statistical time series, largely annual, on American social, economic, political, and geographic development, covering periods from 1610 to 1970. (Out of print at the U.S. Government Printing Office, but available commercially from Kraus International Publications, White Plains, NY, Tel. (800) 247-8519.)

Purchase orders for books should be addressed to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, Tel. (202) 783-3238. Publications are also available in Government Printing Office bookstores located in major cities.

Machine-Readable Products

County and City Data Book, 1988—Files on diskettes and tapes.

State and Metropolitan Area Data Book, 1986—Files on diskettes. Provides approximately 2,000 data items for States, 300 for metropolitan areas, and 100 for central cities.

County Statistics File 3—Files on tape. Contains over 1,700 data items for the United States, 50 States, the District of Columbia, and 3,139 counties or county equivalents.

Requests for tapes and diskettes should be addressed to the Customer Services Branch, Data User Services Division, U.S. Bureau of the Census, Washington, DC 20233, Tel. (301) 763-4100.

The official
National Data Book and Guide to Sources
is the one reference book to have in your home, office, school, or library.

1989
109th Edition

Use this book to.....

★ *Save research time and money*

- In one volume an extensive collection of statistics on social, economic and political subjects from over 200 sources
- Source notes for each table and a guide to statistical publications for more information
- List of telephone contacts for key Federal statistical agencies

★ *Simplify your data search*

- Special section on State rankings
- Comprehensive index
- Many graphs and tables with percents and rankings

★ *Get the data behind today's headlines*

Tables provide the answers to questions like:

- How many people will live in Pennsylvania in the year 2000?
- How many mergers and acquisitions occurred between 1980 and 1987?
- What is the median house price in Atlanta?

★ *Obtain data you can trust*

The best-selling and longest running Federal statistical publication. Quoted and used by experts in every field.

National Education Association: Teachers' salaries, school expenditures (States). ©

National Safety Council: Motor vehicle deaths.

Television Digest, Inc.: Cable television. ©

Transportation Policy Associates: Intercity traffic.

A PORTRAIT OF AMERICA

The statistics contained in this brochure represent a small cross-section of the information available in the Statistical Abstract of the United States. In addition to this annual publication the Statistical Compendia Staff of the Bureau of the Census' Data User Services Division prepares several other general-purpose statistical reference publications. Among these are the State and Metropolitan Area Data Book and the County and City Data Book. The staff also produces related machine-readable data products.

DO YOU WANT TO KNOW ABOUT THE U.S.? - The Abstract presents over 1,400 tables and graphic charts on the social, political, and economic conditions of the U.S. The 109th edition features:

106 entirely new tables on topics such as marriage and divorce, AIDS, home improvements and repairs, air quality in metropolitan areas, gross State product and business starts and failures.

Selected State rankings for 60 data items.

1988 election results.

Inquiries about Bureau programs and products, together with requests for lists, prices, and ordering information, should be directed to —
